CHAPTER XXVII.

Headquarters moved to Memphis—on the road to Memphis—escaping Jackson—complaints and requests—Halleck appointed commander-in-chief—return to Corinth—movements of Bragg—surrender of Clarksville—the advance upon Chattanooga—Sheridan colonel of A Michigan regiment.

My position at Corinth, with a nominal command and yet no command, became so unbearable that I asked permission of Halleck to remove my headquarters to Memphis. I had repeatedly asked, between the fall of Donelson and the evacuation of Corinth, to be relieved from duty under Halleck; but all my applications were refused until the occupation of the town. I then obtained permission to leave the department, but General Sherman happened to call on me as I was about starting and urged me so strongly not to think of going, that I concluded to remain. My application to be permitted to remove my headquarters to Memphis was, however, approved, and on the 21st of June I started for that point with my staff and a cavalry escort of only a part of one company. There was a detachment of two or three companies going some twenty-five miles west to be stationed as a guard to the railroad. I went under cover of this escort to the end of their march, and the next morning proceeded to La Grange with no convoy but the few cavalry men I had with me.

From La Grange to Memphis the distance is forty-seven miles. There were no troops stationed between these two points, except a small force guarding a working party which was engaged in repairing the railroad. Not knowing where this party would be found I halted at La Grange. General Hurlbut was in command there at the time and had his headquarters tents pitched on the lawn of a very commodious country house. The proprietor was at home and, learning of my arrival, he invited General Hurlbut and me to dine with him. I accepted the invitation and spent a very pleasant afternoon with my host, who was a thorough Southern gentleman fully convinced of the justice of secession. After dinner, seated in the capacious porch, he entertained me with a recital of the services he was rendering the cause. He was too old to be in the ranks himself—he must have been quite seventy then—but his means enabled him to be useful in other ways. In ordinary times the homestead where he was now living produced the bread and meat to supply the slaves on his main plantation, in the low-lands of Mississippi. Now he raised food and forage on both places, and thought he would have that year a surplus sufficient to feed three hundred families of poor men who had gone into the war and left their families dependent upon the “patriotism”

Page 2

of those better off. The crops around me looked fine, and I had at the moment an idea that about the time they were ready to be gathered the "Yankee" troops would be in the neighborhood and harvest them for the benefit of those engaged in the suppression of the rebellion instead of its support. I felt, however, the greatest respect for the candor of my host and for his zeal in a cause he thoroughly believed in, though our views were as wide apart as it is possible to conceive.

The 23d of June, 1862, on the road from La Grange to Memphis was very warm, even for that latitude and season. With my staff and small escort I started at an early hour, and before noon we arrived within twenty miles of Memphis. At this point I saw a very comfortable-looking white-haired gentleman seated at the front of his house, a little distance from the road. I let my staff and escort ride ahead while I halted and, for an excuse, asked for a glass of water. I was invited at once to dismount and come in. I found my host very genial and communicative, and staid longer than I had intended, until the lady of the house announced dinner and asked me to join them. The host, however, was not pressing, so that I declined the invitation and, mounting my horse, rode on.

About a mile west from where I had been stopping a road comes up from the southeast, joining that from La Grange to Memphis. A mile west of this junction I found my staff and escort halted and enjoying the shade of forest trees on the lawn of a house located several hundred feet back from the road, their horses hitched to the fence along the line of the road. I, too, stopped and we remained there until the cool of the afternoon, and then rode into Memphis.

The gentleman with whom I had stopped twenty miles from Memphis was a Mr. De Loche, a man loyal to the Union. He had not pressed me to tarry longer with him because in the early part of my visit a neighbor, a Dr. Smith, had called and, on being presented to me, backed off the porch as if something had hit him. Mr. De Loche knew that the rebel General Jackson was in that neighborhood with a detachment of cavalry. His neighbor was as earnest in the southern cause as was Mr. De Loche in that of the Union. The exact location of Jackson was entirely unknown to Mr. De Loche; but he was sure that his neighbor would know it and would give information of my presence, and this made my stay unpleasant to him after the call of Dr. Smith.

I have stated that a detachment of troops was engaged in guarding workmen who were repairing the railroad east of Memphis. On the day I entered Memphis, Jackson captured a small herd of beef cattle which had been sent east for the troops so engaged. The drovers were not enlisted men and he released them. A day or two after one of these drovers came to my headquarters and, relating the circumstances of his capture, said Jackson was very much disappointed that he had not captured me; that he was six or seven

Page 3

miles south of the Memphis and Charleston railroad when he learned that I was stopping at the house of Mr. De Loche, and had ridden with his command to the junction of the road he was on with that from La Grange and Memphis, where he learned that I had passed three-quarters of an hour before. He thought it would be useless to pursue with jaded horses a well-mounted party with so much of a start. Had he gone three-quarters of a mile farther he would have found me with my party quietly resting under the shade of trees and without even arms in our hands with which to defend ourselves.

General Jackson of course did not communicate his disappointment at not capturing me to a prisoner, a young drover; but from the talk among the soldiers the facts related were learned. A day or two later Mr. De Loche called on me in Memphis to apologize for his apparent incivility in not insisting on my staying for dinner. He said that his wife accused him of marked discourtesy, but that, after the call of his neighbor, he had felt restless until I got away. I never met General Jackson before the war, nor during it, but have met him since at his very comfortable summer home at Manitou Springs, Colorado. I reminded him of the above incident, and this drew from him the response that he was thankful now he had not captured me. I certainly was very thankful too.

My occupation of Memphis as district headquarters did not last long. The period, however, was marked by a few incidents which were novel to me. Up to that time I had not occupied any place in the South where the citizens were at home in any great numbers. Dover was within the fortifications at Fort Donelson, and, as far as I remember, every citizen was gone. There were no people living at Pittsburg landing, and but very few at Corinth. Memphis, however, was a populous city, and there were many of the citizens remaining there who were not only thoroughly impressed with the justice of their cause, but who thought that even the "Yankee soldiery" must entertain the same views if they could only be induced to make an honest confession. It took hours of my time every day to listen to complaints and requests. The latter were generally reasonable, and if so they were granted; but the complaints were not always, or even often, well founded. Two instances will mark the general character. First: the officer who commanded at Memphis immediately after the city fell into the hands of the National troops had ordered one of the churches of the city to be opened to the soldiers. Army chaplains were authorized to occupy the pulpit. Second: at the beginning of the war the Confederate Congress had passed a law confiscating all property of "alien enemies" at the South, including the debts of Southerners to Northern men. In consequence of this law, when Memphis was occupied the provost-marshal had forcibly collected all the evidences he could obtain of such debts.

Page 4

Almost the first complaints made to me were these two outrages. The gentleman who made the complaints informed me first of his own high standing as a lawyer, a citizen and a Christian. He was a deacon in the church which had been defiled by the occupation of Union troops, and by a Union chaplain filling the pulpit. He did not use the word "defile," but he expressed the idea very clearly. He asked that the church be restored to the former congregation. I told him that no order had been issued prohibiting the congregation attending the church. He said of course the congregation could not hear a Northern clergyman who differed so radically with them on questions of government. I told him the troops would continue to occupy that church for the present, and that they would not be called upon to hear disloyal sentiments proclaimed from the pulpit. This closed the argument on the first point.

Then came the second. The complainant said that he wanted the papers restored to him which had been surrendered to the provost-marshal under protest; he was a lawyer, and before the establishment of the "Confederate States Government" had been the attorney for a number of large business houses at the North; that "his government" had confiscated all debts due "alien enemies," and appointed commissioners, or officers, to collect such debts and pay them over to the "government": but in his case, owing to his high standing, he had been permitted to hold these claims for collection, the responsible officials knowing that he would account to the "government" for every dollar received. He said that his "government," when it came in possession of all its territory, would hold him personally responsible for the claims he had surrendered to the provost-marshal. His impudence was so sublime that I was rather amused than indignant. I told him, however, that if he would remain in Memphis I did not believe the Confederate government would ever molest him. He left, no doubt, as much amazed at my assurance as I was at the brazenness of his request.

On the 11th of July General Halleck received telegraphic orders appointing him to the command of all the armies, with headquarters in Washington. His instructions pressed him to proceed to his new field of duty with as little delay as was consistent with the safety and interests of his previous command. I was next in rank, and he telegraphed me the same day to report at department headquarters at Corinth. I was not informed by the dispatch that my chief had been ordered to a different field and did not know whether to move my headquarters or not. I telegraphed asking if I was to take my staff with me, and received word in reply: "This place will be your headquarters. You can judge for yourself." I left Memphis for my new field without delay, and reached Corinth on the 15th of the month. General Halleck remained until the 17th of July; but he was very uncommunicative, and gave me no information as to what I had been called to Corinth for.

Page 5

When General Halleck left to assume the duties of general-in-chief I remained in command of the district of West Tennessee. Practically I became a department commander, because no one was assigned to that position over me and I made my reports direct to the general-in-chief; but I was not assigned to the position of department commander until the 25th of October. General Halleck while commanding the Department of the Mississippi had had control as far east as a line drawn from Chattanooga north. My district only embraced West Tennessee and Kentucky west of the Cumberland River. Buell, with the Army of the Ohio, had, as previously stated, been ordered east towards Chattanooga, with instructions to repair the Memphis and Charleston railroad as he advanced. Troops had been sent north by Halleck along the line of the Mobile and Ohio railroad to put it in repair as far as Columbus. Other troops were stationed on the railroad from Jackson, Tennessee, to Grand Junction, and still others on the road west to Memphis.

The remainder of the magnificent army of 120,000 men which entered Corinth on the 30th of May had now become so scattered that I was put entirely on the defensive in a territory whose population was hostile to the Union. One of the first things I had to do was to construct fortifications at Corinth better suited to the garrison that could be spared to man them. The structures that had been built during the months of May and June were left as monuments to the skill of the engineer, and others were constructed in a few days, plainer in design but suited to the command available to defend them.

I disposed the troops belonging to the district in conformity with the situation as rapidly as possible. The forces at Donelson, Clarksville and Nashville, with those at Corinth and along the railroad eastward, I regarded as sufficient for protection against any attack from the west. The Mobile and Ohio railroad was guarded from Rienzi, south of Corinth, to Columbus; and the Mississippi Central railroad from Jackson, Tennessee, to Bolivar. Grand Junction and La Grange on the Memphis railroad were abandoned.

South of the Army of the Tennessee, and confronting it, was Van Dorn, with a sufficient force to organize a movable army of thirty-five to forty thousand men, after being reinforced by Price from Missouri. This movable force could be thrown against either Corinth, Bolivar or Memphis; and the best that could be done in such event would be to weaken the points not threatened in order to reinforce the one that was. Nothing could be gained on the National side by attacking elsewhere, because the territory already occupied was as much as the force present could guard. The most anxious period of the war, to me, was during the time the Army of the Tennessee was guarding the territory acquired by the fall of Corinth and Memphis and before I was sufficiently reinforced to take the offensive. The enemy also had cavalry operating

Page 6

in our rear, making it necessary to guard every point of the railroad back to Columbus, on the security of which we were dependent for all our supplies. Headquarters were connected by telegraph with all points of the command except Memphis and the Mississippi below Columbus. With these points communication was had by the railroad to Columbus, then down the river by boat. To reinforce Memphis would take three or four days, and to get an order there for troops to move elsewhere would have taken at least two days. Memphis therefore was practically isolated from the balance of the command. But it was in Sherman's hands. Then too the troops were well intrenched and the gunboats made a valuable auxiliary.

During the two months after the departure of General Halleck there was much fighting between small bodies of the contending armies, but these encounters were dwarfed by the magnitude of the main battles so as to be now almost forgotten except by those engaged in them. Some of them, however, estimated by the losses on both sides in killed and wounded, were equal in hard fighting to most of the battles of the Mexican war which attracted so much of the attention of the public when they occurred. About the 23d of July Colonel Ross, commanding at Bolivar, was threatened by a large force of the enemy so that he had to be reinforced from Jackson and Corinth. On the 27th there was skirmishing on the Hatchie River, eight miles from Bolivar. On the 30th I learned from Colonel P. H. Sheridan, who had been far to the south, that Bragg in person was at Rome, Georgia, with his troops moving by rail (by way of Mobile) to Chattanooga and his wagon train marching overland to join him at Rome. Price was at this time at Holly Springs, Mississippi, with a large force, and occupied Grand Junction as an outpost. I proposed to the general-in-chief to be permitted to drive him away, but was informed that, while I had to judge for myself, the best use to make of my troops *was not to scatter them*, but hold them ready to reinforce Buell.

The movement of Bragg himself with his wagon trains to Chattanooga across country, while his troops were transported over a long round-about road to the same destination, without need of guards except when in my immediate front, demonstrates the advantage which troops enjoy while acting in a country where the people are friendly. Buell was marching through a hostile region and had to have his communications thoroughly guarded back to a base of supplies. More men were required the farther the National troops penetrated into the enemy's country. I, with an army sufficiently powerful to have destroyed Bragg, was purely on the defensive and accomplishing no more than to hold a force far inferior to my own.

Page 7

On the 2d of August I was ordered from Washington to live upon the country, on the resources of citizens hostile to the government, so far as practicable. I was also directed to "handle rebels within our lines without gloves," to imprison them, or to expel them from their homes and from our lines. I do not recollect having arrested and confined a citizen (not a soldier) during the entire rebellion. I am aware that a great many were sent to northern prisons, particularly to Joliet, Illinois, by some of my subordinates with the statement that it was my order. I had all such released the moment I learned of their arrest; and finally sent a staff officer north to release every prisoner who was said to be confined by my order. There were many citizens at home who deserved punishment because they were soldiers when an opportunity was afforded to inflict an injury to the National cause. This class was not of the kind that were apt to get arrested, and I deemed it better that a few guilty men should escape than that a great many innocent ones should suffer.

On the 14th of August I was ordered to send two more divisions to Buell. They were sent the same day by way of Decatur. On the 22d Colonel Rodney Mason surrendered Clarksville with six companies of his regiment.

Colonel Mason was one of the officers who had led their regiments off the field at almost the first fire of the rebels at Shiloh. He was by nature and education a gentleman, and was terribly mortified at his action when the battle was over. He came to me with tears in his eyes and begged to be allowed to have another trial. I felt great sympathy for him and sent him, with his regiment, to garrison Clarksville and Donelson. He selected Clarksville for his headquarters, no doubt because he regarded it as the post of danger, it being nearer the enemy. But when he was summoned to surrender by a band of guerillas, his constitutional weakness overcame him. He inquired the number of men the enemy had, and receiving a response indicating a force greater than his own he said if he could be satisfied of that fact he would surrender. Arrangements were made for him to count the guerillas, and having satisfied himself that the enemy had the greater force he surrendered and informed his subordinate at Donelson of the fact, advising him to do the same. The guerillas paroled their prisoners and moved upon Donelson, but the officer in command at that point marched out to meet them and drove them away.

Among other embarrassments, at the time of which I now write, was the fact that the government wanted to get out all the cotton possible from the South and directed me to give every facility toward that end. Pay in gold was authorized, and stations on the Mississippi River and on the railroad in our possession had to be designated where cotton would be received. This opened to the enemy not only the means of converting cotton into money, which had

Page 8

a value all over the world and which they so much needed, but it afforded them means of obtaining accurate and intelligent information in regard to our position and strength. It was also demoralizing to the troops. Citizens obtaining permits from the treasury department had to be protected within our lines and given facilities to get out cotton by which they realized enormous profits. Men who had enlisted to fight the battles of their country did not like to be engaged in protecting a traffic which went to the support of an enemy they had to fight, and the profits of which went to men who shared none of their dangers.

On the 30th of August Colonel M. D. Leggett, near Bolivar, with the 20th and 29th Ohio volunteer infantry, was attacked by a force supposed to be about 4,000 strong. The enemy was driven away with a loss of more than one hundred men. On the 1st of September the bridge guard at Medon was attacked by guerillas. The guard held the position until reinforced, when the enemy were routed leaving about fifty of their number on the field dead or wounded, our loss being only two killed and fifteen wounded. On the same day Colonel Dennis, with a force of less than 500 infantry and two pieces of artillery, met the cavalry of the enemy in strong force, a few miles west of Medon, and drove them away with great loss. Our troops buried 179 of the enemy's dead, left upon the field. Afterwards it was found that all the houses in the vicinity of the battlefield were turned into hospitals for the wounded. Our loss, as reported at the time, was forty-five killed and wounded. On the 2d of September I was ordered to send more reinforcements to Buell. Jackson and Bolivar were yet threatened, but I sent the reinforcements. On the 4th I received direct orders to send Granger's division also to Louisville, Kentucky.

General Buell had left Corinth about the 10th of June to march upon Chattanooga; Bragg, who had superseded Beauregard in command, sent one division from Tupelo on the 27th of June for the same place. This gave Buell about seventeen days' start. If he had not been required to repair the railroad as he advanced, the march could have been made in eighteen days at the outside, and Chattanooga must have been reached by the National forces before the rebels could have possibly got there. The road between Nashville and Chattanooga could easily have been put in repair by other troops, so that communication with the North would have been opened in a short time after the occupation of the place by the National troops. If Buell had been permitted to move in the first instance, with the whole of the Army of the Ohio and that portion of the Army of the Mississippi afterwards sent to him, he could have thrown four divisions from his own command along the line of road to repair and guard it.

Granger's division was promptly sent on the 4th of September. I was at the station at Corinth when the troops reached that point, and found General P. H. Sheridan with them. I expressed surprise at seeing him and said that I had not expected him to go.

He showed decided disappointment at the prospect of being detained. I felt a little nettled at his desire to get away and did not detain him.

Page 9

Sheridan was a first lieutenant in the regiment in which I had served eleven years, the 4th infantry, and stationed on the Pacific coast when the war broke out. He was promoted to a captaincy in May, 1861, and before the close of the year managed in some way, I do not know how, to get East. He went to Missouri. Halleck had known him as a very successful young officer in managing campaigns against the Indians on the Pacific coast, and appointed him acting-quartermaster in south-west Missouri. There was no difficulty in getting supplies forward while Sheridan served in that capacity; but he got into difficulty with his immediate superiors because of his stringent rules for preventing the use of public transportation for private purposes. He asked to be relieved from further duty in the capacity in which he was engaged and his request was granted. When General Halleck took the field in April, 1862, Sheridan was assigned to duty on his staff. During the advance on Corinth a vacancy occurred in the colonelcy of the 2d Michigan cavalry. Governor Blair, of Michigan, telegraphed General Halleck asking him to suggest the name of a professional soldier for the vacancy, saying he would appoint a good man without reference to his State. Sheridan was named; and was so conspicuously efficient that when Corinth was reached he was assigned to command a cavalry brigade in the Army of the Mississippi. He was in command at Booneville on the 1st of July with two small regiments, when he was attacked by a force full three times as numerous as his own. By very skilful manoeuvres and boldness of attack he completely routed the enemy. For this he was made a brigadier-general and became a conspicuous figure in the army about Corinth. On this account I was sorry to see him leaving me. His departure was probably fortunate, for he rendered distinguished services in his new field.

Granger and Sheridan reached Louisville before Buell got there, and on the night of their arrival Sheridan with his command threw up works around the railroad station for the defence of troops as they came from the front.

CHAPTER XXVIII.

Advance of Van Dorn and price—price enters luka—battle of luka.

At this time, September 4th, I had two divisions of the Army of the Mississippi stationed at Corinth, Rienzi, Jacinto and Danville. There were at Corinth also Davies' division and two brigades of McArthur's, besides cavalry and artillery. This force constituted my left wing, of which Rosecrans was in command. General Ord commanded the centre, from Bethel to Humboldt on the Mobile and Ohio railroad and from Jackson to Bolivar where the Mississippi Central is crossed by the Hatchie River. General Sherman commanded on the right at Memphis with two of his brigades back at Brownsville, at the crossing

Page 10

of the Hatchie River by the Memphis and Ohio railroad. This made the most convenient arrangement I could devise for concentrating all my spare forces upon any threatened point. All the troops of the command were within telegraphic communication of each other, except those under Sherman. By bringing a portion of his command to Brownsville, from which point there was a railroad and telegraph back to Memphis, communication could be had with that part of my command within a few hours by the use of couriers. In case it became necessary to reinforce Corinth, by this arrangement all the troops at Bolivar, except a small guard, could be sent by rail by the way of Jackson in less than twenty-four hours; while the troops from Brownsville could march up to Bolivar to take their place.

On the 7th of September I learned of the advance of Van Dorn and Price, apparently upon Corinth. One division was brought from Memphis to Bolivar to meet any emergency that might arise from this move of the enemy. I was much concerned because my first duty, after holding the territory acquired within my command, was to prevent further reinforcing of Bragg in Middle Tennessee. Already the Army of Northern Virginia had defeated the army under General Pope and was invading Maryland. In the Centre General Buell was on his way to Louisville and Bragg marching parallel to him with a large Confederate force for the Ohio River.

I had been constantly called upon to reinforce Buell until at this time my entire force numbered less than 50,000 men, of all arms. This included everything from Cairo south within my jurisdiction. If I too should be driven back, the Ohio River would become the line dividing the belligerents west of the Alleghanies, while at the East the line was already farther north than when hostilities commenced at the opening of the war. It is true Nashville was never given up after its first capture, but it would have been isolated and the garrison there would have been obliged to beat a hasty retreat if the troops in West Tennessee had been compelled to fall back. To say at the end of the second year of the war the line dividing the contestants at the East was pushed north of Maryland, a State that had not seceded, and at the West beyond Kentucky, another State which had been always loyal, would have been discouraging indeed. As it was, many loyal people despaired in the fall of 1862 of ever saving the Union. The administration at Washington was much concerned for the safety of the cause it held so dear. But I believe there was never a day when the President did not think that, in some way or other, a cause so just as ours would come out triumphant.

Up to the 11th of September Rosecrans still had troops on the railroad east of Corinth, but they had all been ordered in. By the 12th all were in except a small force under Colonel Murphy of the 8th Wisconsin. He had been detained to guard the remainder of the stores which had not yet been brought in to Corinth.

Page 11

On the 13th of September General Sterling Price entered Iuka, a town about twenty miles east of Corinth on the Memphis and Charleston railroad. Colonel Murphy with a few men was guarding the place. He made no resistance, but evacuated the town on the approach of the enemy. I was apprehensive lest the object of the rebels might be to get troops into Tennessee to reinforce Bragg, as it was afterwards ascertained to be. The authorities at Washington, including the general-in-chief of the army, were very anxious, as I have said, about affairs both in East and Middle Tennessee; and my anxiety was quite as great on their account as for any danger threatening my command. I had not force enough at Corinth to attack Price even by stripping everything; and there was danger that before troops could be got from other points he might be far on his way across the Tennessee. To prevent this all spare forces at Bolivar and Jackson were ordered to Corinth, and cars were concentrated at Jackson for their transportation. Within twenty-four hours from the transmission of the order the troops were at their destination, although there had been a delay of four hours resulting from the forward train getting off the track and stopping all the others. This gave a reinforcement of near 8,000 men, General Ord in command. General Rosecrans commanded the district of Corinth with a movable force of about 9,000 independent of the garrison deemed necessary to be left behind. It was known that General Van Dorn was about a four days' march south of us, with a large force. It might have been part of his plan to attack at Corinth, Price coming from the east while he came up from the south. My desire was to attack Price before Van Dorn could reach Corinth or go to his relief.

General Rosecrans had previously had his headquarters at Iuka, where his command was spread out along the Memphis and Charleston railroad eastward. While there he had a most excellent map prepared showing all the roads and streams in the surrounding country. He was also personally familiar with the ground, so that I deferred very much to him in my plans for the approach. We had cars enough to transport all of General Ord's command, which was to go by rail to Burnsville, a point on the road about seven miles west of Iuka. From there his troops were to march by the north side of the railroad and attack Price from the north-west, while Rosecrans was to move eastward from his position south of Corinth by way of the Jacinto road. A small force was to hold the Jacinto road where it turns to the north-east, while the main force moved on the Fulton road which comes into Iuka further east. This plan was suggested by Rosecrans.

Page 12

Bear Creek, a few miles to the east of the Fulton road, is a formidable obstacle to the movement of troops in the absence of bridges, all of which, in September, 1862, had been destroyed in that vicinity. The Tennessee, to the north-east, not many miles away, was also a formidable obstacle for an army followed by a pursuing force. Ord was on the north-west, and even if a rebel movement had been possible in that direction it could have brought only temporary relief, for it would have carried Price's army to the rear of the National forces and isolated it from all support. It looked to me that, if Price would remain in Iuka until we could get there, his annihilation was inevitable.

On the morning of the 18th of September General Ord moved by rail to Burnsville, and there left the cars and moved out to perform his part of the programme. He was to get as near the enemy as possible during the day and intrench himself so as to hold his position until the next morning. Rosecrans was to be up by the morning of the 19th on the two roads before described, and the attack was to be from all three quarters simultaneously. Troops enough were left at Jacinto and Rienzi to detain any cavalry that Van Dorn might send out to make a sudden dash into Corinth until I could be notified. There was a telegraph wire along the railroad, so there would be no delay in communication. I detained cars and locomotives enough at Burnsville to transport the whole of Ord's command at once, and if Van Dorn had moved against Corinth instead of Iuka I could have thrown in reinforcements to the number of 7,000 or 8,000 before he could have arrived. I remained at Burnsville with a detachment of about 900 men from Ord's command and communicated with my two wings by courier. Ord met the advance of the enemy soon after leaving Burnsville. Quite a sharp engagement ensued, but he drove the rebels back with considerable loss, including one general officer killed. He maintained his position and was ready to attack by daylight the next morning. I was very much disappointed at receiving a dispatch from Rosecrans after midnight from Jacinto, twenty-two miles from Iuka, saying that some of his command had been delayed, and that the rear of his column was not yet up as far as Jacinto. He said, however, that he would still be at Iuka by two o'clock the next day. I did not believe this possible because of the distance and the condition of the roads, which was bad; besides, troops after a forced march of twenty miles are not in a good condition for fighting the moment they get through. It might do in marching to relieve a beleaguered garrison, but not to make an assault. I immediately sent Ord a copy of Rosecrans' dispatch and ordered him to be in readiness to attack the moment he heard the sound of guns to the south or south-east. He was instructed to notify his officers to be on the alert for any indications of battle. During the 19th the wind blew in the wrong direction to transmit sound either towards the point where Ord was, or to Burnsville where I had remained.

Page 13

A couple of hours before dark on the 19th Rosecrans arrived with the head of his column at garnets, the point where the Jacinto road to luka leaves the road going east. He here turned north without sending any troops to the Fulton road. While still moving in column up the Jacinto road he met a force of the enemy and had his advance badly beaten and driven back upon the main road. In this short engagement his loss was considerable for the number engaged, and one battery was taken from him. The wind was still blowing hard and in the wrong direction to transmit sounds towards either Ord or me. Neither he nor I nor any one in either command heard a gun that was fired upon the battle-field. After the engagement Rosecrans sent me a dispatch announcing the result. This was brought by a courier. There was no road between Burnsville and the position then occupied by Rosecrans and the country was impassable for a man on horseback. The courier bearing the message was compelled to move west nearly to Jacinto before he found a road leading to Burnsville. This made it a late hour of the night before I learned of the battle that had taken place during the afternoon. I at once notified Ord of the fact and ordered him to attack early in the morning. The next morning Rosecrans himself renewed the attack and went into luka with but little resistance. Ord also went in according to orders, without hearing a gun from the south of town but supposing the troops coming from the south-west must be up by that time. Rosecrans, however, had put no troops upon the Fulton road, and the enemy had taken advantage of this neglect and retreated by that road during the night. Word was soon brought to me that our troops were in luka. I immediately rode into town and found that the enemy was not being pursued even by the cavalry. I ordered pursuit by the whole of Rosecrans' command and went on with him a few miles in person. He followed only a few miles after I left him and then went into camp, and the pursuit was continued no further. I was disappointed at the result of the battle of luka—but I had so high an opinion of General Rosecrans that I found no fault at the time.

CHAPTER XXIX.

Van Dorn's movements—battle of Corinth—command of the department of the Tennessee.

On the 19th of September General Geo. H. Thomas was ordered east to reinforce Buell. This threw the army at my command still more on the defensive. The Memphis and Charleston railroad was abandoned, except at Corinth, and small forces were left at Chewalla and Grand Junction. Soon afterwards the latter of these two places was given up and Bolivar became our most advanced position on the Mississippi Central railroad. Our cavalry was kept well to the front and frequent expeditions were sent out to watch the movements of the enemy. We were in a country where nearly all the people, except the negroes, were hostile to us and friendly to the cause we were trying to suppress. It was easy, therefore, for the enemy to get early information of our every move. We, on the contrary, had to go after our information in force, and then often returned without it.

Page 14

On the 22d Bolivar was threatened by a large force from south of Grand Junction, supposed to be twenty regiments of infantry with cavalry and artillery. I reinforced Bolivar, and went to Jackson in person to superintend the movement of troops to whatever point the attack might be made upon. The troops from Corinth were brought up in time to repel the threatened movement without a battle. Our cavalry followed the enemy south of Davis' mills in Mississippi.

On the 30th I found that Van Dorn was apparently endeavoring to strike the Mississippi River above Memphis. At the same time other points within my command were so threatened that it was impossible to concentrate a force to drive him away. There was at this juncture a large Union force at Helena, Arkansas, which, had it been within my command, I could have ordered across the river to attack and break up the Mississippi Central railroad far to the south. This would not only have called Van Dorn back, but would have compelled the retention of a large rebel force far to the south to prevent a repetition of such raids on the enemy's line of supplies. Geographical lines between the commands during the rebellion were not always well chosen, or they were too rigidly adhered to.

Van Dorn did not attempt to get upon the line above Memphis, as had apparently been his intention. He was simply covering a deeper design; one much more important to his cause. By the 1st of October it was fully apparent that Corinth was to be attacked with great force and determination, and that Van Dorn, Lovell, Price, Villepigue and Rust had joined their strength for this purpose. There was some skirmishing outside of Corinth with the advance of the enemy on the 3d. The rebels massed in the north-west angle of the Memphis and Charleston and the Mobile and Ohio railroads, and were thus between the troops at Corinth and all possible reinforcements. Any fresh troops for us must come by a circuitous route.

On the night of the 3d, accordingly, I ordered General McPherson, who was at Jackson, to join Rosecrans at Corinth with reinforcements picked up along the line of the railroad equal to a brigade. Hurlbut had been ordered from Bolivar to march for the same destination; and as Van Dorn was coming upon Corinth from the north-west some of his men fell in with the advance of Hurlbut's and some skirmishing ensued on the evening of the 3d. On the 4th Van Dorn made a dashing attack, hoping, no doubt, to capture Rosecrans before his reinforcements could come up. In that case the enemy himself could have occupied the defences of Corinth and held at bay all the Union troops that arrived. In fact he could have taken the offensive against the reinforcements with three or four times their number and still left a sufficient garrison in the works about Corinth to hold them. He came near success, some of his troops penetrating the National lines at least once, but the works that were built

Page 15

after Halleck's departure enabled Rosecrans to hold his position until the troops of both McPherson and Hurlbut approached towards the rebel front and rear. The enemy was finally driven back with great slaughter: all their charges, made with great gallantry, were repulsed. The loss on our side was heavy, but nothing to compare with Van Dorn's. McPherson came up with the train of cars bearing his command as close to the enemy as was prudent, debarked on the rebel flank and got in to the support of Rosecrans just after the repulse. His approach, as well as that of Hurlbut, was known to the enemy and had a moral effect. General Rosecrans, however, failed to follow up the victory, although I had given specific orders in advance of the battle for him to pursue the moment the enemy was repelled. He did not do so, and I repeated the order after the battle. In the first order he was notified that the force of 4,000 men which was going to his assistance would be in great peril if the enemy was not pursued.

General Ord had joined Hurlbut on the 4th and being senior took command of his troops. This force encountered the head of Van Dorn's retreating column just as it was crossing the Hatchie by a bridge some ten miles out from Corinth. The bottom land here was swampy and bad for the operations of troops, making a good place to get an enemy into. Ord attacked the troops that had crossed the bridge and drove them back in a panic. Many were killed, and others were drowned by being pushed off the bridge in their hurried retreat. Ord followed and met the main force. He was too weak in numbers to assault, but he held the bridge and compelled the enemy to resume his retreat by another bridge higher up the stream. Ord was wounded in this engagement and the command devolved on Hurlbut.

Rosecrans did not start in pursuit till the morning of the 5th and then took the wrong road. Moving in the enemy's country he travelled with a wagon train to carry his provisions and munitions of war. His march was therefore slower than that of the enemy, who was moving towards his supplies. Two or three hours of pursuit on the day of battle, without anything except what the men carried on their persons, would have been worth more than any pursuit commenced the next day could have possibly been. Even when he did start, if Rosecrans had followed the route taken by the enemy, he would have come upon Van Dorn in a swamp with a stream in front and Ord holding the only bridge; but he took the road leading north and towards Chewalla instead of west, and, after having marched as far as the enemy had moved to get to the Hatchie, he was as far from battle as when he started. Hurlbut had not the numbers to meet any such force as Van Dorn's if they had been in any mood for fighting, and he might have been in great peril.

Page 16

I now regarded the time to accomplish anything by pursuit as past and, after Rosecrans reached Jonesboro, I ordered him to return. He kept on to Ripley, however, and was persistent in wanting to go farther. I thereupon ordered him to halt and submitted the matter to the general-in-chief, who allowed me to exercise my judgment in the matter, but inquired "why not pursue?" Upon this I ordered Rosecrans back. Had he gone much farther he would have met a greater force than Van Dorn had at Corinth and behind intrenchments or on chosen ground, and the probabilities are he would have lost his army.

The battle of Corinth was bloody, our loss being 315 killed, 1,812 wounded and 232 missing. The enemy lost many more. Rosecrans reported 1,423 dead and 2,225 prisoners. We fought behind breastworks, which accounts in some degree for the disparity. Among the killed on our side was General Hackelman. General Oglesby was badly, it was for some time supposed mortally, wounded. I received a congratulatory letter from the President, which expressed also his sorrow for the losses.

This battle was recognized by me as being a decided victory, though not so complete as I had hoped for, nor nearly so complete as I now think was within the easy grasp of the commanding officer at Corinth. Since the war it is known that the result, as it was, was a crushing blow to the enemy, and felt by him much more than it was appreciated at the North. The battle relieved me from any further anxiety for the safety of the territory within my jurisdiction, and soon after receiving reinforcements I suggested to the general-in-chief a forward movement against Vicksburg.

On the 23d of October I learned of Pemberton's being in command at Holly Springs and much reinforced by conscripts and troops from Alabama and Texas. The same day General Rosecrans was relieved from duty with my command, and shortly after he succeeded Buell in the command of the army in Middle Tennessee. I was delighted at the promotion of General Rosecrans to a separate command, because I still believed that when independent of an immediate superior the qualities which I, at that time, credited him with possessing, would show themselves. As a subordinate I found that I could not make him do as I wished, and had determined to relieve him from duty that very day.

At the close of the operations just described my force, in round numbers, was 48,500. Of these 4,800 were in Kentucky and Illinois, 7,000 in Memphis, 19,200 from Mound City south, and 17,500 at Corinth. General McClelland had been authorized from Washington to go north and organize troops to be used in opening the Mississippi. These new levies with other reinforcements now began to come in.

Page 17

On the 25th of October I was placed in command of the Department of the Tennessee. Reinforcements continued to come from the north and by the 2d of November I was prepared to take the initiative. This was a great relief after the two and a half months of continued defence over a large district of country, and where nearly every citizen was an enemy ready to give information of our every move. I have described very imperfectly a few of the battles and skirmishes that took place during this time. To describe all would take more space than I can allot to the purpose; to make special mention of all the officers and troops who distinguished themselves, would take a volume. (9)

CHAPTER XXX.

The campaign against Vicksburg—employing the freedmen—occupation of Holly Springs—Sherman ordered to Memphis—Sherman's movements down the Mississippi—Van Dorn captures Holly Springs—collecting forage and food.

Vicksburg was important to the enemy because it occupied the first high ground coming close to the river below Memphis. From there a railroad runs east, connecting with other roads leading to all points of the Southern States. A railroad also starts from the opposite side of the river, extending west as far as Shreveport, Louisiana. Vicksburg was the only channel, at the time of the events of which this chapter treats, connecting the parts of the Confederacy divided by the Mississippi. So long as it was held by the enemy, the free navigation of the river was prevented. Hence its importance. Points on the river between Vicksburg and Port Hudson were held as dependencies; but their fall was sure to follow the capture of the former place.

The campaign against Vicksburg commenced on the 2d of November as indicated in a dispatch to the general-in-chief in the following words: "I have commenced a movement on Grand Junction, with three divisions from Corinth and two from Bolivar. Will leave here [Jackson, Tennessee] to-morrow, and take command in person. If found practicable, I will go to Holly Springs, and, may be, Grenada, completing railroad and telegraph as I go."

At this time my command was holding the Mobile and Ohio railroad from about twenty-five miles south of Corinth, north to Columbus, Kentucky; the Mississippi Central from Bolivar north to its junction with the Mobile and Ohio; the Memphis and Charleston from Corinth east to Bear Creek, and the Mississippi River from Cairo to Memphis. My entire command was no more than was necessary to hold these lines, and hardly that if kept on the defensive. By moving against the enemy and into his unsubdued, or not yet captured, territory, driving their army before us, these lines

Page 18

would nearly hold themselves; thus affording a large force for field operations. My moving force at that time was about 30,000 men, and I estimated the enemy confronting me, under Pemberton, at about the same number. General McPherson commanded my left wing and General C. S. Hamilton the centre, while Sherman was at Memphis with the right wing. Pemberton was fortified at the Tallahatchie, but occupied Holly Springs and Grand Junction on the Mississippi Central railroad. On the 8th we occupied Grand Junction and La Grange, throwing a considerable force seven or eight miles south, along the line of the railroad. The road from Bolivar forward was repaired and put in running order as the troops advanced.

Up to this time it had been regarded as an axiom in war that large bodies of troops must operate from a base of supplies which they always covered and guarded in all forward movements. There was delay therefore in repairing the road back, and in gathering and forwarding supplies to the front.

By my orders, and in accordance with previous instructions from Washington, all the forage within reach was collected under the supervision of the chief quartermaster and the provisions under the chief commissary, receipts being given when there was any one to take them; the supplies in any event to be accounted for as government stores. The stock was bountiful, but still it gave me no idea of the possibility of supplying a moving column in an enemy's country from the country itself.

It was at this point, probably, where the first idea of a "Freedman's Bureau" took its origin. Orders of the government prohibited the expulsion of the negroes from the protection of the army, when they came in voluntarily. Humanity forbade allowing them to starve. With such an army of them, of all ages and both sexes, as had congregated about Grand Junction, amounting to many thousands, it was impossible to advance. There was no special authority for feeding them unless they were employed as teamsters, cooks and pioneers with the army; but only able-bodied young men were suitable for such work. This labor would support but a very limited percentage of them. The plantations were all deserted; the cotton and corn were ripe: men, women and children above ten years of age could be employed in saving these crops. To do this work with contrabands, or to have it done, organization under a competent chief was necessary. On inquiring for such a man Chaplain Eaton, now and for many years the very able United States Commissioner of Education, was suggested. He proved as efficient in that field as he has since done in his present one. I gave him all the assistants and guards he called for. We together fixed the prices to be paid for the negro labor, whether rendered to the government or to individuals. The cotton was to be picked from abandoned plantations, the laborers to receive the stipulated price (my recollection is twelve and a half cents per pound for picking and ginning) from the quartermaster, he shipping the cotton north to be sold for the benefit of the government.

Citizens remaining on their plantations were allowed the privilege of having their crops saved by freedmen on the same terms.

Page 19

At once the freedmen became self-sustaining. The money was not paid to them directly, but was expended judiciously and for their benefit. They gave me no trouble afterwards.

Later the freedmen were engaged in cutting wood along the Mississippi River to supply the large number of steamers on that stream. A good price was paid for chopping wood used for the supply of government steamers (steamers chartered and which the government had to supply with fuel). Those supplying their own fuel paid a much higher price. In this way a fund was created not only sufficient to feed and clothe all, old and young, male and female, but to build them comfortable cabins, hospitals for the sick, and to supply them with many comforts they had never known before.

At this stage of the campaign against Vicksburg I was very much disturbed by newspaper rumors that General McClelland was to have a separate and independent command within mine, to operate against Vicksburg by way of the Mississippi River. Two commanders on the same field are always one too many, and in this case I did not think the general selected had either the experience or the qualifications to fit him for so important a position. I feared for the safety of the troops intrusted to him, especially as he was to raise new levies, raw troops, to execute so important a trust. But on the 12th I received a dispatch from General Halleck saying that I had command of all the troops sent to my department and authorizing me to fight the enemy where I pleased. The next day my cavalry was in Holly Springs, and the enemy fell back south of the Tallahatchie.

Holly Springs I selected for my depot of supplies and munitions of war, all of which at that time came by rail from Columbus, Kentucky, except the few stores collected about La Grange and Grand Junction. This was a long line (increasing in length as we moved south) to maintain in an enemy's country. On the 15th of November, while I was still at Holly Springs, I sent word to Sherman to meet me at Columbus. We were but forty-seven miles apart, yet the most expeditious way for us to meet was for me to take the rail to Columbus and Sherman a steamer for the same place. At that meeting, besides talking over my general plans I gave him his orders to join me with two divisions and to march them down the Mississippi Central railroad if he could. Sherman, who was always prompt, was up by the 29th to Cottage Hill, ten miles north of Oxford. He brought three divisions with him, leaving a garrison of only four regiments of infantry, a couple of pieces of artillery and a small detachment of cavalry. Further reinforcements he knew were on their way from the north to Memphis. About this time General Halleck ordered troops from Helena, Arkansas (territory west of the Mississippi was not under my command then) to cut the road in Pemberton's rear. The expedition was under Generals Hovey and C. C. Washburn and was successful so far as reaching the railroad was concerned, but the damage done was very slight and was soon repaired.

Page 20

The Tallahatchie, which confronted me, was very high, the railroad bridge destroyed and Pemberton strongly fortified on the south side. A crossing would have been impossible in the presence of an enemy. I sent the cavalry higher up the stream and they secured a crossing. This caused the enemy to evacuate their position, which was possibly accelerated by the expedition of Hovey and Washburn. The enemy was followed as far south as Oxford by the main body of troops, and some seventeen miles farther by McPherson's command. Here the pursuit was halted to repair the railroad from the Tallahatchie northward, in order to bring up supplies. The piles on which the railroad bridge rested had been left standing. The work of constructing a roadway for the troops was but a short matter, and, later, rails were laid for cars.

During the delay at Oxford in repairing railroads I learned that an expedition down the Mississippi now was inevitable and, desiring to have a competent commander in charge, I ordered Sherman on the 8th of December back to Memphis to take charge. The following were his orders:

Headquarters 13th Army Corps, Department of the Tennessee. *Oxford, Mississippi, December 8, 1862.*

Major-general W. T. Sherman, Commanding Right Wing:

You will proceed, with as little delay as possible, to Memphis, Tennessee, taking with you one division of your present command. On your arrival at Memphis you will assume command of all the troops there, and that portion of General Curtis's forces at present east of the Mississippi River, and organize them into brigades and divisions in your own army. As soon as possible move with them down the river to the vicinity of Vicksburg, and with the co-operation of the gunboat fleet under command of Flag-officer Porter proceed to the reduction of that place in such a manner as circumstances, and your own judgment, may dictate.

The amount of rations, forage, land transportation, *etc.*, necessary to take, will be left entirely with yourself. The Quartermaster at St. Louis will be instructed to send you transportation for 30,000 men; should you still find yourself deficient, your quartermaster will be authorized to make up the deficiency from such transports as may come into the port of Memphis.

On arriving in Memphis, put yourself in communication with Admiral Porter, and arrange with him for his co-operation.

Inform me at the earliest practicable day of the time when you will embark, and such plans as may then be matured. I will hold the forces here in readiness to co-operate with you in such manner as the movements of the enemy may make necessary.

Leave the District of Memphis in the command of an efficient officer, and with a garrison of four regiments of infantry, the siege guns, and whatever cavalry may be there.

U. S. *Grant*, Major-General.

Page 21

This idea had presented itself to my mind earlier, for on the 3d of December I asked Halleck if it would not be well to hold the enemy south of the Yallabusha and move a force from Helena and Memphis on Vicksburg. On the 5th again I suggested, from Oxford, to Halleck that if the Helena troops were at my command I thought it would be possible to take them and the Memphis forces south of the mouth of the Yazoo River, and thus secure Vicksburg and the State of Mississippi. Halleck on the same day, the 5th of December, directed me not to attempt to hold the country south of the Tallahatchie, but to collect 25,000 troops at Memphis by the 20th for the Vicksburg expedition. I sent Sherman with two divisions at once, informed the general-in-chief of the fact, and asked whether I should command the expedition down the river myself or send Sherman. I was authorized to do as I thought best for the accomplishment of the great object in view. I sent Sherman and so informed General Halleck.

As stated, my action in sending Sherman back was expedited by a desire to get him in command of the forces separated from my direct supervision. I feared that delay might bring McClernand, who was his senior and who had authority from the President and Secretary of War to exercise that particular command,—and independently. I doubted McClernand's fitness; and I had good reason to believe that in forestalling him I was by no means giving offence to those whose authority to command was above both him and me.

Neither my orders to General Sherman, nor the correspondence between us or between General Halleck and myself, contemplated at the time my going further south than the Yallabusha. Pemberton's force in my front was the main part of the garrison of Vicksburg, as the force with me was the defence of the territory held by us in West Tennessee and Kentucky. I hoped to hold Pemberton in my front while Sherman should get in his rear and into Vicksburg. The further north the enemy could be held the better.

It was understood, however, between General Sherman and myself that our movements were to be co-operative; if Pemberton could not be held away from Vicksburg I was to follow him; but at that time it was not expected to abandon the railroad north of the Yallabusha. With that point as a secondary base of supplies, the possibility of moving down the Yazoo until communications could be opened with the Mississippi was contemplated.

It was my intention, and so understood by Sherman and his command, that if the enemy should fall back I would follow him even to the gates of Vicksburg. I intended in such an event to hold the road to Grenada on the Yallabusha and cut loose from there, expecting to establish a new base of supplies on the Yazoo, or at Vicksburg itself, with Grenada to fall back upon in case of failure. It should be remembered that at the time I speak of it had not been demonstrated that an army could operate in an enemy's territory depending upon the country for supplies. A halt was called at Oxford with the advance seventeen miles south of there, to bring up the road to the latter point and to bring supplies of food, forage and munitions to the front.

Page 22

On the 18th of December I received orders from Washington to divide my command into four army corps, with General McClernand to command one of them and to be assigned to that part of the army which was to operate down the Mississippi. This interfered with my plans, but probably resulted in my ultimately taking the command in person. McClernand was at that time in Springfield, Illinois. The order was obeyed without any delay. Dispatches were sent to him the same day in conformity.

On the 20th General Van Dorn appeared at Holly Springs, my secondary base of supplies, captured the garrison of 1,500 men commanded by Colonel Murphy, of the 8th Wisconsin regiment, and destroyed all our munitions of war, food and forage. The capture was a disgraceful one to the officer commanding but not to the troops under him. At the same time Forrest got on our line of railroad between Jackson, Tennessee, and Columbus, Kentucky, doing much damage to it. This cut me off from all communication with the north for more than a week, and it was more than two weeks before rations or forage could be issued from stores obtained in the regular way. This demonstrated the impossibility of maintaining so long a line of road over which to draw supplies for an army moving in an enemy's country. I determined, therefore, to abandon my campaign into the interior with Columbus as a base, and returned to La Grange and Grand Junction destroying the road to my front and repairing the road to Memphis, making the Mississippi river the line over which to draw supplies. Pemberton was falling back at the same time.

The moment I received the news of Van Dorn's success I sent the cavalry at the front back to drive him from the country. He had start enough to move north destroying the railroad in many places, and to attack several small garrisons intrenched as guards to the railroad. All these he found warned of his coming and prepared to receive him. Van Dorn did not succeed in capturing a single garrison except the one at Holly Springs, which was larger than all the others attacked by him put together. Murphy was also warned of Van Dorn's approach, but made no preparations to meet him. He did not even notify his command.

Colonel Murphy was the officer who, two months before, had evacuated Iuka on the approach of the enemy. General Rosecrans denounced him for the act and desired to have him tried and punished. I sustained the colonel at the time because his command was a small one compared with that of the enemy—not one-tenth as large—and I thought he had done well to get away without falling into their hands. His leaving large stores to fall into Price's possession I looked upon as an oversight and excused it on the ground of inexperience in military matters. He should, however, have destroyed them. This last surrender demonstrated to my mind that Rosecrans' judgment of Murphy's conduct at Iuka was correct. The surrender of Holly Springs was most reprehensible and showed either the disloyalty of Colonel Murphy to the cause which he professed to serve, or gross cowardice.

Page 23

After the war was over I read from the diary of a lady who accompanied General Pemberton in his retreat from the Tallahatchie, that the retreat was almost a panic. The roads were bad and it was difficult to move the artillery and trains. Why there should have been a panic I do not see. No expedition had yet started down the Mississippi River. Had I known the demoralized condition of the enemy, or the fact that central Mississippi abounded so in all army supplies, I would have been in pursuit of Pemberton while his cavalry was destroying the roads in my rear.

After sending cavalry to drive Van Dorn away, my next order was to dispatch all the wagons we had, under proper escort, to collect and bring in all supplies of forage and food from a region of fifteen miles east and west of the road from our front back to Grand Junction, leaving two months' supplies for the families of those whose stores were taken. I was amazed at the quantity of supplies the country afforded. It showed that we could have subsisted off the country for two months instead of two weeks without going beyond the limits designated. This taught me a lesson which was taken advantage of later in the campaign when our army lived twenty days with the issue of only five days' rations by the commissary. Our loss of supplies was great at Holly Springs, but it was more than compensated for by those taken from the country and by the lesson taught.

The news of the capture of Holly Springs and the destruction of our supplies caused much rejoicing among the people remaining in Oxford. They came with broad smiles on their faces, indicating intense joy, to ask what I was going to do now without anything for my soldiers to eat. I told them that I was not disturbed; that I had already sent troops and wagons to collect all the food and forage they could find for fifteen miles on each side of the road. Countenances soon changed, and so did the inquiry. The next was, "What are we to do?" My response was that we had endeavored to feed ourselves from our own northern resources while visiting them; but their friends in gray had been uncivil enough to destroy what we had brought along, and it could not be expected that men, with arms in their hands, would starve in the midst of plenty. I advised them to emigrate east, or west, fifteen miles and assist in eating up what we left.

CHAPTER XXXI.

*Headquarters moved to Holly Springs—general M'CLERNAND in command
—assuming command at Young's point—operations above Vicksburg
—fortifications about Vicksburg—the canal—lake Providence
—operations at Yazoo pass.*

Page 24

This interruption in my communications north—I was really cut off from communication with a great part of my own command during this time —resulted in Sherman's moving from Memphis before McClernand could arrive, for my dispatch of the 18th did not reach McClernand. Pemberton got back to Vicksburg before Sherman got there. The rebel positions were on a bluff on the Yazoo River, some miles above its mouth. The waters were high so that the bottoms were generally overflowed, leaving only narrow causeways of dry land between points of debarkation and the high bluffs. These were fortified and defended at all points. The rebel position was impregnable against any force that could be brought against its front. Sherman could not use one-fourth of his force. His efforts to capture the city, or the high ground north of it, were necessarily unavailing.

Sherman's attack was very unfortunate, but I had no opportunity of communicating with him after the destruction of the road and telegraph to my rear on the 20th. He did not know but what I was in the rear of the enemy and depending on him to open a new base of supplies for the troops with me. I had, before he started from Memphis, directed him to take with him a few small steamers suitable for the navigation of the Yazoo, not knowing but that I might want them to supply me after cutting loose from my base at Grenada.

On the 23d I removed my headquarters back to Holly Springs. The troops were drawn back gradually, but without haste or confusion, finding supplies abundant and no enemy following. The road was not damaged south of Holly Springs by Van Dorn, at least not to an extent to cause any delay. As I had resolved to move headquarters to Memphis, and to repair the road to that point, I remained at Holly Springs until this work was completed.

On the 10th of January, the work on the road from Holly Springs to Grand Junction and thence to Memphis being completed, I moved my headquarters to the latter place. During the campaign here described, the losses (mostly captures) were about equal, crediting the rebels with their Holly Springs capture, which they could not hold.

When Sherman started on his expedition down the river he had 20,000 men, taken from Memphis, and was reinforced by 12,000 more at Helena, Arkansas. The troops on the west bank of the river had previously been assigned to my command. McClernand having received the orders for his assignment reached the mouth of the Yazoo on the 2d of January, and immediately assumed command of all the troops with Sherman, being a part of his own corps, the 13th, and all of Sherman's, the 15th. Sherman, and Admiral Porter with the fleet, had withdrawn from the Yazoo. After consultation they decided that neither the army nor navy could render service to the cause where they were, and learning that I had withdrawn from the interior of Mississippi, they determined to return to the Arkansas River and

Page 25

to attack Arkansas Post, about fifty miles up that stream and garrisoned by about five or six thousand men. Sherman had learned of the existence of this force through a man who had been captured by the enemy with a steamer loaded with ammunition and other supplies intended for his command. The man had made his escape. McClelland approved this move reluctantly, as Sherman says. No obstacle was encountered until the gunboats and transports were within range of the fort. After three days' bombardment by the navy an assault was made by the troops and marines, resulting in the capture of the place, and in taking 5,000 prisoners and 17 guns. I was at first disposed to disapprove of this move as an unnecessary side movement having no especial bearing upon the work before us; but when the result was understood I regarded it as very important. Five thousand Confederate troops left in the rear might have caused us much trouble and loss of property while navigating the Mississippi.

Immediately after the reduction of Arkansas Post and the capture of the garrison, McClelland returned with his entire force to Napoleon, at the mouth of the Arkansas River. From here I received messages from both Sherman and Admiral Porter, urging me to come and take command in person, and expressing their distrust of McClelland's ability and fitness for so important and intricate an expedition.

On the 17th I visited McClelland and his command at Napoleon. It was here made evident to me that both the army and navy were so distrustful of McClelland's fitness to command that, while they would do all they could to insure success, this distrust was an element of weakness. It would have been criminal to send troops under these circumstances into such danger. By this time I had received authority to relieve McClelland, or to assign any person else to the command of the river expedition, or to assume command in person. I felt great embarrassment about McClelland. He was the senior major-general after myself within the department. It would not do, with his rank and ambition, to assign a junior over him. Nothing was left, therefore, but to assume the command myself. I would have been glad to put Sherman in command, to give him an opportunity to accomplish what he had failed in the December before; but there seemed no other way out of the difficulty, for he was junior to McClelland. Sherman's failure needs no apology.

On the 20th I ordered General McClelland with the entire command, to Young's Point and Milliken's Bend, while I returned to Memphis to make all the necessary preparation for leaving the territory behind me secure. General Hurlbut with the 16th corps was left in command. The Memphis and Charleston railroad was held, while the Mississippi Central was given up. Columbus was the only point between Cairo and Memphis, on the river, left with a garrison. All the troops and guns from the posts on the abandoned railroad and river were sent to the front.

Page 26

On the 29th of January I arrived at Young's Point and assumed command the following day. General McClernand took exception in a most characteristic way—for him. His correspondence with me on the subject was more in the nature of a reprimand than a protest. It was highly insubordinate, but I overlooked it, as I believed, for the good of the service. General McClernand was a politician of very considerable prominence in his State; he was a member of Congress when the secession war broke out; he belonged to that political party which furnished all the opposition there was to a vigorous prosecution of the war for saving the Union; there was no delay in his declaring himself for the Union at all hazards, and there was no uncertain sound in his declaration of where he stood in the contest before the country. He also gave up his seat in Congress to take the field in defence of the principles he had proclaimed.

The real work of the campaign and siege of Vicksburg now began. The problem was to secure a footing upon dry ground on the east side of the river from which the troops could operate against Vicksburg. The Mississippi River, from Cairo south, runs through a rich alluvial valley of many miles in width, bound on the east by land running from eighty up to two or more hundred feet above the river. On the west side the highest land, except in a few places, is but little above the highest water. Through this valley the river meanders in the most tortuous way, varying in direction to all points of the compass. At places it runs to the very foot of the bluffs. After leaving Memphis, there are no such highlands coming to the water's edge on the east shore until Vicksburg is reached.

The intervening land is cut up by bayous filled from the river in high water—many of them navigable for steamers. All of them would be, except for overhanging trees, narrowness and tortuous course, making it impossible to turn the bends with vessels of any considerable length. Marching across this country in the face of an enemy was impossible; navigating it proved equally impracticable. The strategical way according to the rule, therefore, would have been to go back to Memphis; establish that as a base of supplies; fortify it so that the storehouses could be held by a small garrison, and move from there along the line of railroad, repairing as we advanced, to the Yallabusha, or to Jackson, Mississippi. At this time the North had become very much discouraged. Many strong Union men believed that the war must prove a failure. The elections of 1862 had gone against the party which was for the prosecution of the war to save the Union if it took the last man and the last dollar. Voluntary enlistments had ceased throughout the greater part of the North, and the draft had been resorted to to fill up our ranks. It was my judgment at the time that to make a backward movement as long as that from Vicksburg to Memphis, would be interpreted, by many of those yet full of hope for the preservation of the Union, as a defeat, and that the draft would be resisted, desertions ensue and the power to capture and punish deserters lost. There was nothing left to be done but to go *forward to A decisive victory*. This was in my mind from the moment I took command in person at Young's Point.

Page 27

The winter of 1862-3 was a noted one for continuous high water in the Mississippi and for heavy rains along the lower river. To get dry land, or rather land above the water, to encamp the troops upon, took many miles of river front. We had to occupy the levees and the ground immediately behind. This was so limited that one corps, the 17th, under General McPherson, was at Lake Providence, seventy miles above Vicksburg.

It was in January the troops took their position opposite Vicksburg. The water was very high and the rains were incessant. There seemed no possibility of a land movement before the end of March or later, and it would not do to lie idle all this time. The effect would be demoralizing to the troops and injurious to their health. Friends in the North would have grown more and more discouraged, and enemies in the same section more and more insolent in their gibes and denunciation of the cause and those engaged in it.

I always admired the South, as bad as I thought their cause, for the boldness with which they silenced all opposition and all croaking, by press or by individuals, within their control. War at all times, whether a civil war between sections of a common country or between nations, ought to be avoided, if possible with honor. But, once entered into, it is too much for human nature to tolerate an enemy within their ranks to give aid and comfort to the armies of the opposing section or nation.

Vicksburg, as stated before, is on the first high land coming to the river's edge, below that on which Memphis stands. The bluff, or high land, follows the left bank of the Yazoo for some distance and continues in a southerly direction to the Mississippi River, thence it runs along the Mississippi to Warrenton, six miles below. The Yazoo River leaves the high land a short distance below Haines' Bluff and empties into the Mississippi nine miles above Vicksburg. Vicksburg is built on this high land where the Mississippi washes the base of the hill. Haines' Bluff, eleven miles from Vicksburg, on the Yazoo River, was strongly fortified. The whole distance from there to Vicksburg and thence to Warrenton was also intrenched, with batteries at suitable distances and rifle-pits connecting them.

From Young's Point the Mississippi turns in a north-easterly direction to a point just above the city, when it again turns and runs south-westerly, leaving vessels, which might attempt to run the blockade, exposed to the fire of batteries six miles below the city before they were in range of the upper batteries. Since then the river has made a cut-off, leaving what was the peninsula in front of the city, an island. North of the Yazoo was all a marsh, heavily timbered, cut up with bayous, and much overflowed. A front attack was therefore impossible, and was never contemplated; certainly not by me. The problem then became, how to secure a landing on high ground east of the Mississippi without an apparent retreat. Then commenced a series of experiments to consume time, and to divert the attention of the enemy, of my troops and of the public generally. I, myself, never felt great confidence that any of the experiments resorted to would prove successful. Nevertheless I was always prepared to take advantage of them in case they did.

Page 28

In 1862 General Thomas Williams had come up from New Orleans and cut a ditch ten or twelve feet wide and about as deep, straight across from Young's Point to the river below. The distance across was a little over a mile. It was Williams' expectation that when the river rose it would cut a navigable channel through; but the canal started in an eddy from both ends, and, of course, it only filled up with water on the rise without doing any execution in the way of cutting. Mr. Lincoln had navigated the Mississippi in his younger days and understood well its tendency to change its channel, in places, from time to time. He set much store accordingly by this canal. General McClernand had been, therefore, directed before I went to Young's Point to push the work of widening and deepening this canal. After my arrival the work was diligently pushed with about 4,000 men—as many as could be used to advantage—until interrupted by a sudden rise in the river that broke a dam at the upper end, which had been put there to keep the water out until the excavation was completed. This was on the 8th of March.

Even if the canal had proven a success, so far as to be navigable for steamers, it could not have been of much advantage to us. It runs in a direction almost perpendicular to the line of bluffs on the opposite side, or east bank, of the river. As soon as the enemy discovered what we were doing he established a battery commanding the canal throughout its length. This battery soon drove out our dredges, two in number, which were doing the work of thousands of men. Had the canal been completed it might have proven of some use in running transports through, under the cover of night, to use below; but they would yet have to run batteries, though for a much shorter distance.

While this work was progressing we were busy in other directions, trying to find an available landing on high ground on the east bank of the river, or to make water-ways to get below the city, avoiding the batteries.

On the 30th of January, the day after my arrival at the front, I ordered General McPherson, stationed with his corps at Lake Providence, to cut the levee at that point. If successful in opening a channel for navigation by this route, it would carry us to the Mississippi River through the mouth of the Red River, just above Port Hudson and four hundred miles below Vicksburg by the river.

Lake Providence is a part of the old bed of the Mississippi, about a mile from the present channel. It is six miles long and has its outlet through Bayou Baxter, Bayou Macon, and the Tensas, Washita and Red Rivers. The last three are navigable streams at all seasons. Bayous Baxter and Macon are narrow and tortuous, and the banks are covered with dense forests overhanging the channel. They were also filled with fallen timber, the accumulation of years. The land along the Mississippi River, from Memphis down, is in all instances highest next to the river, except where

Page 29

the river washes the bluffs which form the boundary of the valley through which it winds. Bayou Baxter, as it reaches lower land, begins to spread out and disappears entirely in a cypress swamp before it reaches the Macon. There was about two feet of water in this swamp at the time. To get through it, even with vessels of the lightest draft, it was necessary to clear off a belt of heavy timber wide enough to make a passage way. As the trees would have to be cut close to the bottom—under water—it was an undertaking of great magnitude.

On the 4th of February I visited General McPherson, and remained with him several days. The work had not progressed so far as to admit the water from the river into the lake, but the troops had succeeded in drawing a small steamer, of probably not over thirty tons' capacity, from the river into the lake. With this we were able to explore the lake and bayou as far as cleared. I saw then that there was scarcely a chance of this ever becoming a practicable route for moving troops through an enemy's country. The distance from Lake Providence to the point where vessels going by that route would enter the Mississippi again, is about four hundred and seventy miles by the main river. The distance would probably be greater by the tortuous bayous through which this new route would carry us. The enemy held Port Hudson, below where the Red River debouches, and all the Mississippi above to Vicksburg. The Red River, Washita and Tensas were, as has been said, all navigable streams, on which the enemy could throw small bodies of men to obstruct our passage and pick off our troops with their sharpshooters. I let the work go on, believing employment was better than idleness for the men. Then, too, it served as a cover for other efforts which gave a better prospect of success. This work was abandoned after the canal proved a failure.

Lieutenant-Colonel Wilson of my staff was sent to Helena, Arkansas, to examine and open a way through Moon Lake and the Yazoo Pass if possible. Formerly there was a route by way of an inlet from the Mississippi River into Moon Lake, a mile east of the river, thence east through Yazoo Pass to Coldwater, along the latter to the Tallahatchie, which joins the Yallabusha about two hundred and fifty miles below Moon Lake and forms the Yazoo River. These were formerly navigated by steamers trading with the rich plantations along their banks; but the State of Mississippi had built a strong levee across the inlet some years before, leaving the only entrance for vessels into this rich region the one by way of the mouth of the Yazoo several hundreds of miles below.

Page 30

On the 2d of February this dam, or levee, was cut. The river being high the rush of water through the cut was so great that in a very short time the entire obstruction was washed away. The bayous were soon filled and much of the country was overflowed. This pass leaves the Mississippi River but a few miles below Helena. On the 24th General Ross, with his brigade of about 4,500 men on transports, moved into this new water-way. The rebels had obstructed the navigation of Yazoo Pass and the Coldwater by felling trees into them. Much of the timber in this region being of greater specific gravity than water, and being of great size, their removal was a matter of great labor; but it was finally accomplished, and on the 11th of March Ross found himself, accompanied by two gunboats under the command of Lieutenant-Commander Watson Smith, confronting a fortification at Greenwood, where the Tallahatchie and Yallabusha unite and the Yazoo begins. The bends of the rivers are such at this point as to almost form an island, scarcely above water at that stage of the river. This island was fortified and manned. It was named Fort Pemberton after the commander at Vicksburg. No land approach was accessible. The troops, therefore, could render no assistance towards an assault further than to establish a battery on a little piece of ground which was discovered above water. The gunboats, however, attacked on the 11th and again on the 13th of March. Both efforts were failures and were not renewed. One gunboat was disabled and we lost six men killed and twenty-five wounded. The loss of the enemy was less.

Fort Pemberton was so little above the water that it was thought that a rise of two feet would drive the enemy out. In hope of enlisting the elements on our side, which had been so much against us up to this time, a second cut was made in the Mississippi levee, this time directly opposite Helena, or six miles above the former cut. It did not accomplish the desired result, and Ross, with his fleet, started back. On the 22d he met Quinby with a brigade at Yazoo Pass. Quinby was the senior of Ross, and assumed command. He was not satisfied with returning to his former position without seeing for himself whether anything could be accomplished. Accordingly Fort Pemberton was revisited by our troops; but an inspection was sufficient this time without an attack. Quinby, with his command, returned with but little delay. In the meantime I was much exercised for the safety of Ross, not knowing that Quinby had been able to join him. Reinforcements were of no use in a country covered with water, as they would have to remain on board of their transports. Relief had to come from another quarter. So I determined to get into the Yazoo below Fort Pemberton.

Page 31

Steel's Bayou empties into the Yazoo River between Haines' Bluff and its mouth. It is narrow, very tortuous, and fringed with a very heavy growth of timber, but it is deep. It approaches to within one mile of the Mississippi at Eagle Bend, thirty miles above Young's Point. Steel's Bayou connects with Black Bayou, Black Bayou with Deer Creek, Deer Creek with Rolling Fork, Rolling Fork with the Big Sunflower River, and the Big Sunflower with the Yazoo River about ten miles above Haines' Bluff in a right line but probably twenty or twenty-five miles by the winding of the river. All these waterways are of about the same nature so far as navigation is concerned, until the Sunflower is reached; this affords free navigation.

Admiral Porter explored this waterway as far as Deer Creek on the 14th of March, and reported it navigable. On the next day he started with five gunboats and four mortar-boats. I went with him for some distance. The heavy overhanging timber retarded progress very much, as did also the short turns in so narrow a stream. The gunboats, however, ploughed their way through without other damage than to their appearance. The transports did not fare so well although they followed behind. The road was somewhat cleared for them by the gunboats. In the evening I returned to headquarters to hurry up reinforcements. Sherman went in person on the 16th, taking with him Stuart's division of the 15th corps. They took large river transports to Eagle Bend on the Mississippi, where they debarked and marched across to Steel's Bayou, where they re-embarked on the transports. The river steamers, with their tall smokestacks and light guards extending out, were so much impeded that the gunboats got far ahead. Porter, with his fleet, got within a few hundred yards of where the sailing would have been clear and free from the obstructions caused by felling trees into the water, when he encountered rebel sharp-shooters, and his progress was delayed by obstructions in his front. He could do nothing with gunboats against sharpshooters. The rebels, learning his route, had sent in about 4,000 men—many more than there were sailors in the fleet.

Sherman went back, at the request of the admiral, to clear out Black Bayou and to hurry up reinforcements, which were far behind. On the night of the 19th he received notice from the admiral that he had been attacked by sharp-shooters and was in imminent peril. Sherman at once returned through Black Bayou in a canoe, and passed on until he met a steamer, with the last of the reinforcements he had, coming up. They tried to force their way through Black Bayou with their steamer, but, finding it slow and tedious work, debarked and pushed forward on foot. It was night when they landed, and intensely dark. There was but a narrow strip of land above water, and that was grown up with underbrush or cane. The troops lighted their way through this with candles carried in their hands for a mile and a half, when

Page 32

they came to an open plantation. Here the troops rested until morning. They made twenty-one miles from this resting-place by noon the next day, and were in time to rescue the fleet. Porter had fully made up his mind to blow up the gunboats rather than have them fall into the hands of the enemy. More welcome visitors he probably never met than the “boys in blue” on this occasion. The vessels were backed out and returned to their rendezvous on the Mississippi; and thus ended in failure the fourth attempt to get in rear of Vicksburg.

CHAPTER XXXII.

The bayous west of the Mississippi—criticisms of the northern press —running the batteries—loss of the Indianola—disposition of the troops.

The original canal scheme was also abandoned on the 27th of March. The effort to make a waterway through Lake Providence and the connecting bayous was abandoned as wholly impracticable about the same time.

At Milliken’s Bend, and also at Young’s Point, bayous or channels start, which connecting with other bayous passing Richmond, Louisiana, enter the Mississippi at Carthage twenty-five or thirty miles above Grand Gulf. The Mississippi levee cuts the supply of water off from these bayous or channels, but all the rainfall behind the levee, at these points, is carried through these same channels to the river below. In case of a crevasse in this vicinity, the water escaping would find its outlet through the same channels. The dredges and laborers from the canal having been driven out by overflow and the enemy’s batteries, I determined to open these other channels, if possible. If successful the effort would afford a route, away from the enemy’s batteries, for our transports. There was a good road back of the levees, along these bayous, to carry the troops, artillery and wagon trains over whenever the water receded a little, and after a few days of dry weather. Accordingly, with the abandonment of all the other plans for reaching a base heretofore described, this new one was undertaken.

As early as the 4th of February I had written to Halleck about this route, stating that I thought it much more practicable than the other undertaking (the Lake Providence route), and that it would have been accomplished with much less labor if commenced before the water had got all over the country.

The upper end of these bayous being cut off from a water supply, further than the rainfall back of the levees, was grown up with dense timber for a distance of several miles from their source. It was necessary, therefore, to clear this out before letting in the water from the river. This work was continued until the waters of the river began to recede and the road to Richmond, Louisiana, emerged from the water.

Page 33

One small steamer and some barges were got through this channel, but no further use could be made of it because of the fall in the river. Beyond this it was no more successful than the other experiments with which the winter was whiled away. All these failures would have been very discouraging if I had expected much from the efforts; but I had not. From the first the most I hoped to accomplish was the passage of transports, to be used below Vicksburg, without exposure to the long line of batteries defending that city.

This long, dreary and, for heavy and continuous rains and high water, unprecedented winter was one of great hardship to all engaged about Vicksburg. The river was higher than its natural banks from December, 1862, to the following April. The war had suspended peaceful pursuits in the South, further than the production of army supplies, and in consequence the levees were neglected and broken in many places and the whole country was covered with water. Troops could scarcely find dry ground on which to pitch their tents. Malarial fevers broke out among the men. Measles and small-pox also attacked them. The hospital arrangements and medical attendance were so perfect, however, that the loss of life was much less than might have been expected. Visitors to the camps went home with dismal stories to relate; Northern papers came back to the soldiers with these stories exaggerated. Because I would not divulge my ultimate plans to visitors, they pronounced me idle, incompetent and unfit to command men in an emergency, and clamored for my removal. They were not to be satisfied, many of them, with my simple removal, but named who my successor should be. McClernand, Fremont, Hunter and McClellan were all mentioned in this connection. I took no steps to answer these complaints, but continued to do my duty, as I understood it, to the best of my ability. Every one has his superstitions. One of mine is that in positions of great responsibility every one should do his duty to the best of his ability where assigned by competent authority, without application or the use of influence to change his position. While at Cairo I had watched with very great interest the operations of the Army of the Potomac, looking upon that as the main field of the war. I had no idea, myself, of ever having any large command, nor did I suppose that I was equal to one; but I had the vanity to think that as a cavalry officer I might succeed very well in the command of a brigade. On one occasion, in talking about this to my staff officers, all of whom were civilians without any military education whatever, I said that I would give anything if I were commanding a brigade of cavalry in the Army of the Potomac and I believed I could do some good. Captain Hillyer spoke up and suggested that I make application to be transferred there to command the cavalry. I then told him that I would cut my right arm off first, and mentioned this superstition.

Page 34

In time of war the President, being by the Constitution Commander-in-chief of the Army and Navy, is responsible for the selection of commanders. He should not be embarrassed in making his selections. I having been selected, my responsibility ended with my doing the best I knew how. If I had sought the place, or obtained it through personal or political influence, my belief is that I would have feared to undertake any plan of my own conception, and would probably have awaited direct orders from my distant superiors. Persons obtaining important commands by application or political influence are apt to keep a written record of complaints and predictions of defeat, which are shown in case of disaster. Somebody must be responsible for their failures.

With all the pressure brought to bear upon them, both President Lincoln and General Halleck stood by me to the end of the campaign. I had never met Mr. Lincoln, but his support was constant.

At last the waters began to recede; the roads crossing the peninsula behind the levees of the bayous, were emerging from the waters; the troops were all concentrated from distant points at Milliken's Bend preparatory to a final move which was to crown the long, tedious and discouraging labors with success.

I had had in contemplation the whole winter the movement by land to a point below Vicksburg from which to operate, subject only to the possible but not expected success of some one of the expedients resorted to for the purpose of giving us a different base. This could not be undertaken until the waters receded. I did not therefore communicate this plan, even to an officer of my staff, until it was necessary to make preparations for the start. My recollection is that Admiral Porter was the first one to whom I mentioned it. The co-operation of the navy was absolutely essential to the success (even to the contemplation) of such an enterprise. I had no more authority to command Porter than he had to command me. It was necessary to have part of his fleet below Vicksburg if the troops went there. Steamers to use as ferries were also essential. The navy was the only escort and protection for these steamers, all of which in getting below had to run about fourteen miles of batteries. Porter fell into the plan at once, and suggested that he had better superintend the preparation of the steamers selected to run the batteries, as sailors would probably understand the work better than soldiers. I was glad to accept his proposition, not only because I admitted his argument, but because it would enable me to keep from the enemy a little longer our designs. Porter's fleet was on the east side of the river above the mouth of the Yazoo, entirely concealed from the enemy by the dense forests that intervened. Even spies could not get near him, on account of the undergrowth and overflowed lands. Suspicions of some mysterious movements were aroused. Our river guards discovered

Page 35

one day a small skiff moving quietly and mysteriously up the river near the east shore, from the direction of Vicksburg, towards the fleet. On overhauling the boat they found a small white flag, not much larger than a handkerchief, set up in the stern, no doubt intended as a flag of truce in case of discovery. The boat, crew and passengers were brought ashore to me. The chief personage aboard proved to be Jacob Thompson, Secretary of the Interior under the administration of President Buchanan. After a pleasant conversation of half an hour or more I allowed the boat and crew, passengers and all, to return to Vicksburg, without creating a suspicion that there was a doubt in my mind as to the good faith of Mr. Thompson and his flag.

Admiral Porter proceeded with the preparation of the steamers for their hazardous passage of the enemy's batteries. The great essential was to protect the boilers from the enemy's shot, and to conceal the fires under the boilers from view. This he accomplished by loading the steamers, between the guards and boilers on the boiler deck up to the deck above, with bales of hay and cotton, and the deck in front of the boilers in the same way, adding sacks of grain. The hay and grain would be wanted below, and could not be transported in sufficient quantity by the muddy roads over which we expected to march.

Before this I had been collecting, from St. Louis and Chicago, yawls and barges to be used as ferries when we got below. By the 16th of April Porter was ready to start on his perilous trip. The advance, flagship Benton, Porter commanding, started at ten o'clock at night, followed at intervals of a few minutes by the Lafayette with a captured steamer, the Price, lashed to her side, the Louisville, Mound City, Pittsburgh and Carondelet—all of these being naval vessels. Next came the transports —Forest Queen, Silver Wave and Henry Clay, each towing barges loaded with coal to be used as fuel by the naval and transport steamers when below the batteries. The gunboat Tuscumbia brought up the rear. Soon after the start a battery between Vicksburg and Warrenton opened fire across the intervening peninsula, followed by the upper batteries, and then by batteries all along the line. The gunboats ran up close under the bluffs, delivering their fire in return at short distances, probably without much effect. They were under fire for more than two hours and every vessel was struck many times, but with little damage to the gunboats. The transports did not fare so well. The Henry Clay was disabled and deserted by her crew. Soon after a shell burst in the cotton packed about the boilers, set the vessel on fire and burned her to the water's edge. The burning mass, however, floated down to Carthage before grounding, as did also one of the barges in tow.

Page 36

The enemy were evidently expecting our fleet, for they were ready to light up the river by means of bonfires on the east side and by firing houses on the point of land opposite the city on the Louisiana side. The sight was magnificent, but terrible. I witnessed it from the deck of a river transport, run out into the middle of the river and as low down as it was prudent to go. My mind was much relieved when I learned that no one on the transports had been killed and but few, if any, wounded. During the running of the batteries men were stationed in the holds of the transports to partially stop with cotton shot-holes that might be made in the hulls. All damage was afterwards soon repaired under the direction of Admiral Porter.

The experiment of passing batteries had been tried before this, however, during the war. Admiral Farragut had run the batteries at Port Hudson with the flagship Hartford and one iron-clad and visited me from below Vicksburg. The 13th of February Admiral Porter had sent the gunboat Indianola, Lieutenant-Commander George Brown commanding, below. She met Colonel Ellet of the Marine brigade below Natchez on a captured steamer. Two of the Colonel's fleet had previously run the batteries, producing the greatest consternation among the people along the Mississippi from Vicksburg (10) *to the Red River.*

The Indianola remained about the mouth of the Red River some days, and then started up the Mississippi. The Confederates soon raised the Queen of the West, (11) *and repaired her. With this vessel and the ram Webb, which they had had for some time in the Red River, and two other steamers, they followed the Indianola. The latter was encumbered with barges of coal in tow, and consequently could make but little speed against the rapid current of the Mississippi. The Confederate fleet overtook her just above Grand Gulf, and attacked her after dark on the 24th of February. The Indianola was superior to all the others in armament, and probably would have destroyed them or driven them away, but for her encumbrance. As it was she fought them for an hour and a half, but, in the dark, was struck seven or eight times by the ram and other vessels, and was finally disabled and reduced to a sinking condition. The armament was thrown overboard and the vessel run ashore. Officers and crew then surrendered.*

I had started McClernand with his corps of four divisions on the 29th of March, by way of Richmond, Louisiana, to New Carthage, hoping that he might capture Grand Gulf before the balance of the troops could get there; but the roads were very bad, scarcely above water yet. Some miles from New Carthage the levee to Bayou Vidal was broken in several places, overflowing the roads for the distance of two miles. Boats were collected from the surrounding bayous, and some constructed on the spot from such material as could be collected, to transport the troops across the overflowed interval.

Page 37

By the 6th of April McClelland had reached New Carthage with one division and its artillery, the latter ferried through the woods by these boats. On the 17th I visited New Carthage in person, and saw that the process of getting troops through in the way we were doing was so tedious that a better method must be devised. The water was falling, and in a few days there would not be depth enough to use boats; nor would the land be dry enough to march over. McClelland had already found a new route from Smith's plantation where the crevasse occurred, to Perkins' plantation, eight to twelve miles below New Carthage. This increased the march from Milliken's Bend from twenty-seven to nearly forty miles. Four bridges had to be built across bayous, two of them each over six hundred feet long, making about two thousand feet of bridging in all. The river falling made the current in these bayous very rapid, increasing the difficulty of building and permanently fastening these bridges; but the ingenuity of the "Yankee soldier" was equal to any emergency. The bridges were soon built of such material as could be found near by, and so substantial were they that not a single mishap occurred in crossing all the army with artillery, cavalry and wagon trains, except the loss of one siege gun (a thirty-two pounder). This, if my memory serves me correctly, broke through the only pontoon bridge we had in all our march across the peninsula. These bridges were all built by McClelland's command, under the supervision of Lieutenant Hains of the Engineer Corps.

I returned to Milliken's Bend on the 18th or 19th, and on the 20th issued the following final order for the movement of troops:

Headquarters department of the Tennessee, Milliken's Bend, Louisiana, April 20, 1863.

Special Orders, No. 110. * * * * * VIII. The following orders are published for the information and guidance of the "Army in the Field," in its present movement to obtain a foothold on the east bank of the Mississippi River, from which Vicksburg can be approached by practicable roads.

First.—The Thirteenth army corps, Major-General John A. McClelland commanding, will constitute the right wing.

Second.—The Fifteenth army corps, Major-General W. T. Sherman commanding, will constitute the left wing.

Third.—The Seventeenth army corps, Major-General James B. McPherson commanding, will constitute the centre.

Fourth.—The order of march to New Carthage will be from right to left.

Fifth.—Reserves will be formed by divisions from each army corps; or, an entire army corps will be held as a reserve, as necessity may require. When the reserve is formed by divisions, each division will remain under the immediate command of its respective corps commander, unless otherwise specially ordered for a particular emergency.

Page 38

Sixth.—Troops will be required to bivouac, until proper facilities can be afforded for the transportation of camp equipage.

Seventh.—In the present movement, one tent will be allowed to each company for the protection of rations from rain; one wall tent for each regimental headquarters; one wall tent for each brigade headquarters; and one wall tent for each division headquarters; corps commanders having the books and blanks of their respective commands to provide for, are authorized to take such tents as are absolutely necessary, but not to exceed the number allowed by General Orders No. 160, A. G. O., series of 1862.

Eighth.—All the teams of the three army corps, under the immediate charge of the quartermasters bearing them on their returns, will constitute a train for carrying supplies and ordnance and the authorized camp equipage of the army.

Ninth.—As fast as the Thirteenth army corps advances, the Seventeenth army corps will take its place; and it, in turn, will be followed in like manner by the Fifteenth army corps.

Tenth.—Two regiments from each army corps will be detailed by corps commanders, to guard the lines from Richmond to New Carthage.

Eleventh.—General hospitals will be established by the medical director between Duckport and Milliken's Bend. All sick and disabled soldiers will be left in these hospitals. Surgeons in charge of hospitals will report convalescents as fast as they become fit for duty. Each corps commander will detail an intelligent and good drill officer, to remain behind and take charge of the convalescents of their respective corps; officers so detailed will organize the men under their charge into squads and companies, without regard to the regiments they belong to; and in the absence of convalescent commissioned officers to command them, will appoint non-commissioned officers or privates. The force so organized will constitute the guard of the line from Duckport to Milliken's Bend. They will furnish all the guards and details required for general hospitals, and with the contrabands that may be about the camps, will furnish all the details for loading and unloading boats.

Twelfth.—The movement of troops from Milliken's Bend to New Carthage will be so conducted as to allow the transportation of ten days' supply of rations, and one-half the allowance of ordnance, required by previous orders.

Thirteenth.—Commanders are authorized and enjoined to collect all the beef cattle, corn and other necessary supplies on the line of march; but wanton destruction of property, taking of articles useless for military purposes, insulting citizens, going into and searching houses without proper orders from division commanders, are positively prohibited. All such irregularities must be summarily punished.

Fourteenth.—Brigadier-General J. C. Sullivan is appointed to the command of all the forces detailed for the protection of the line from here to New Carthage. His particular attention is called to General Orders, No. 69, from Adjutant-General's Office, Washington, of date March 20, 1863.

Page 39

By order of *major-general* U. S. Grant.

McClermand was already below on the Mississippi. Two of McPherson's divisions were put upon the march immediately. The third had not yet arrived from Lake Providence; it was on its way to Milliken's Bend and was to follow on arrival.

Sherman was to follow McPherson. Two of his divisions were at Duckport and Young's Point, and the third under Steele was under orders to return from Greenville, Mississippi, where it had been sent to expel a rebel battery that had been annoying our transports.

It had now become evident that the army could not be rationed by a wagon train over the single narrow and almost impassable road between Milliken's Bend and Perkins' plantation. Accordingly six more steamers were protected as before, to run the batteries, and were loaded with supplies. They took twelve barges in tow, loaded also with rations. On the night of the 22d of April they ran the batteries, five getting through more or less disabled while one was sunk. About half the barges got through with their needed freight.

When it was first proposed to run the blockade at Vicksburg with river steamers there were but two captains or masters who were willing to accompany their vessels, and but one crew. Volunteers were called for from the army, men who had had experience in any capacity in navigating the western rivers. Captains, pilots, mates, engineers and deck-hands enough presented themselves to take five times the number of vessels we were moving through this dangerous ordeal. Most of them were from Logan's division, composed generally of men from the southern part of Illinois and from Missouri. All but two of the steamers were commanded by volunteers from the army, and all but one so manned. In this instance, as in all others during the war, I found that volunteers could be found in the ranks and among the commissioned officers to meet every call for aid whether mechanical or professional. Colonel W. S. Oliver was master of transportation on this occasion by special detail.

CHAPTER XXXIII.

Attack on Grand Gulf—operations below Vicksburg.

On the 24th my headquarters were with the advance at Perkins' plantation. Reconnoissances were made in boats to ascertain whether there was high land on the east shore of the river where we might land above Grand Gulf. There was none practicable. Accordingly the troops were set in motion for Hard Times, twenty-two miles farther down the river and nearly opposite Grand Gulf. The loss of two steamers and six barges reduced our transportation so that only 10,000 men could be moved by water. Some of the steamers that had got below were injured in their machinery, so that

they were only useful as barges towed by those less severely injured. All the troops, therefore, except what could be transported in one trip, had to march. The road lay west of Lake St. Joseph. Three large bayous had to be crossed. They were rapidly bridged in the same manner as those previously encountered. (12)

Page 40

On the 27th McClermand's corps was all at Hard Times, and McPherson's was following closely. I had determined to make the attempt to effect a landing on the east side of the river as soon as possible. Accordingly, on the morning of the 29th, McClermand was directed to embark all the troops from his corps that our transports and barges could carry. About 10,000 men were so embarked. The plan was to have the navy silence the guns at Grand Gulf, and to have as many men as possible ready to debark in the shortest possible time under cover of the fire of the navy and carry the works by storm. The following order was issued:

Perkins plantation, La., April 27, 1863.

Major-general J. A. MCCLERNAND, Commanding 13th A. C.

Commence immediately the embarkation of your corps, or so much of it as there is transportation for. Have put aboard the artillery and every article authorized in orders limiting baggage, except the men, and hold them in readiness, with their places assigned, to be moved at a moment's warning.

All the troops you may have, except those ordered to remain behind, send to a point nearly opposite Grand Gulf, where you see, by special orders of this date, General McPherson is ordered to send one division.

The plan of the attack will be for the navy to attack and silence all the batteries commanding the river. Your corps will be on the river, ready to run to and debark on the nearest eligible land below the promontory first brought to view passing down the river. Once on shore, have each commander instructed beforehand to form his men the best the ground will admit of, and take possession of the most commanding points, but avoid separating your command so that it cannot support itself. The first object is to get a foothold where our troops can maintain themselves until such time as preparations can be made and troops collected for a forward movement.

Admiral Porter has proposed to place his boats in the position indicated to you a few days ago, and to bring over with them such troops as may be below the city after the guns of the enemy are silenced.

It may be that the enemy will occupy positions back from the city, out of range of the gunboats, so as to make it desirable to run past Grand Gulf and land at Rodney. In case this should prove the plan, a signal will be arranged and you duly informed, when the transports are to start with this view. Or, it may be expedient for the boats to run past, but not the men. In this case, then, the transports would have to be brought back to where the men could land and move by forced marches to below Grand Gulf, re-embark rapidly and proceed to the latter place. There will be required, then, three signals; one, to indicate that the transports can run down and debark the troops at

Grand Gulf; one, that the transports can run by without the troops; and the last, that the transports can run by with the troops on board.

Page 41

Should the men have to march, all baggage and artillery will be left to run the blockade.

If not already directed, require your men to keep three days' rations in their haversacks, not to be touched until a movement commences.

U. S. *Grant*, Major-General.

At 8 o'clock A.M., 29th, Porter made the attack with his entire strength present, eight gunboats. For nearly five and a half hours the attack was kept up without silencing a single gun of the enemy. All this time McClernand's 10,000 men were huddled together on the transports in the stream ready to attempt a landing if signalled. I occupied a tug from which I could see the effect of the battle on both sides, within range of the enemy's guns; but a small tug, without armament, was not calculated to attract the fire of batteries while they were being assailed themselves. About half-past one the fleet withdrew, seeing their efforts were entirely unavailing. The enemy ceased firing as soon as we withdrew. I immediately signalled the Admiral and went aboard his ship. The navy lost in this engagement eighteen killed and fifty-six wounded. A large proportion of these were of the crew of the flagship, and most of those from a single shell which penetrated the ship's side and exploded between decks where the men were working their guns. The sight of the mangled and dying men which met my eye as I boarded the ship was sickening.

Grand Gulf is on a high bluff where the river runs at the very foot of it. It is as defensible upon its front as Vicksburg and, at that time, would have been just as impossible to capture by a front attack. I therefore requested Porter to run the batteries with his fleet that night, and to take charge of the transports, all of which would be wanted below.

There is a long tongue of land from the Louisiana side extending towards Grand Gulf, made by the river running nearly east from about three miles above and nearly in the opposite direction from that point for about the same distance below. The land was so low and wet that it would not have been practicable to march an army across but for a levee. I had had this explored before, as well as the east bank below to ascertain if there was a possible point of debarkation north of Rodney. It was found that the top of the levee afforded a good road to march upon.

Porter, as was always the case with him, not only acquiesced in the plan, but volunteered to use his entire fleet as transports. I had intended to make this request, but he anticipated me. At dusk, when concealed from the view of the enemy at Grand Gulf, McClernand landed his command on the west bank. The navy and transports ran the batteries successfully. The troops marched across the point of land under cover of night, unobserved. By the time it was light the enemy saw our whole fleet, ironclads, gunboats, river steamers and barges, quietly moving down the river three miles below them, black, or rather blue, with National troops.

Page 42

When the troops debarked, the evening of the 29th, it was expected that we would have to go to Rodney, about nine miles below, to find a landing; but that night a colored man came in who informed me that a good landing would be found at Bruinsburg, a few miles above Rodney, from which point there was a good road leading to Port Gibson some twelve miles in the interior. The information was found correct, and our landing was effected without opposition.

Sherman had not left his position above Vicksburg yet. On the morning of the 27th I ordered him to create a diversion by moving his corps up the Yazoo and threatening an attack on Haines' Bluff.

My object was to compel Pemberton to keep as much force about Vicksburg as I could, until I could secure a good footing on high land east of the river. The move was eminently successful and, as we afterwards learned, created great confusion about Vicksburg and doubts about our real design. Sherman moved the day of our attack on Grand Gulf, the 29th, with ten regiments of his command and eight gunboats which Porter had left above Vicksburg.

He debarked his troops and apparently made every preparation to attack the enemy while the navy bombarded the main forts at Haines' Bluff. This move was made without a single casualty in either branch of the service. On the first of May Sherman received orders from me (sent from Hard Times the evening of the 29th of April) to withdraw from the front of Haines' Bluff and follow McPherson with two divisions as fast as he could.

I had established a depot of supplies at Perkins' plantation. Now that all our gunboats were below Grand Gulf it was possible that the enemy might fit out boats in the Big Black with improvised armament and attempt to destroy these supplies. McPherson was at Hard Times with a portion of his corps, and the depot was protected by a part of his command. The night of the 29th I directed him to arm one of the transports with artillery and send it up to Perkins' plantation as a guard; and also to have the siege guns we had brought along moved there and put in position.

The embarkation below Grand Gulf took place at De Shroon's, Louisiana, six miles above Bruinsburg, Mississippi. Early on the morning of 30th of April McClernand's corps and one division of McPherson's corps were speedily landed.

When this was effected I felt a degree of relief scarcely ever equalled since. Vicksburg was not yet taken it is true, nor were its defenders demoralized by any of our previous moves. I was now in the enemy's country, with a vast river and the stronghold of Vicksburg between me and my base of supplies. But I was on dry ground on the same side of the river with the enemy. All the campaigns, labors, hardships and exposures from the month of December previous to this time that had been made and endured, were for the accomplishment of this one object.

Page 43

I had with me the 13th corps, General McClelland commanding, and two brigades of Logan's division of the 17th corps, General McPherson commanding—in all not more than twenty thousand men to commence the campaign with. These were soon reinforced by the remaining brigade of Logan's division and Crocker's division of the 17th corps. On the 7th of May I was further reinforced by Sherman with two divisions of his, the 15th corps. My total force was then about thirty-three thousand men.

The enemy occupied Grand Gulf, Haines' Bluff and Jackson with a force of nearly sixty thousand men. Jackson is fifty miles east of Vicksburg and is connected with it by a railroad. My first problem was to capture Grand Gulf to use as a base.

Bruinsburg is two miles from high ground. The bottom at that point is higher than most of the low land in the valley of the Mississippi, and a good road leads to the bluff. It was natural to expect the garrison from Grand Gulf to come out to meet us and prevent, if they could, our reaching this solid base. Bayou Pierre enters the Mississippi just above Bruinsburg and, as it is a navigable stream and was high at the time, in order to intercept us they had to go by Port Gibson, the nearest point where there was a bridge to cross upon. This more than doubled the distance from Grand Gulf to the high land back of Bruinsburg. No time was to be lost in securing this foothold. Our transportation was not sufficient to move all the army across the river at one trip, or even two; but the landing of the 13th corps and one division of the 17th was effected during the day, April 30th, and early evening. McClelland was advanced as soon as ammunition and two days' rations (to last five) could be issued to his men. The bluffs were reached an hour before sunset and McClelland was pushed on, hoping to reach Port Gibson and save the bridge spanning the Bayou Pierre before the enemy could get there; for crossing a stream in the presence of an enemy is always difficult. Port Gibson, too, is the starting point of roads to Grand Gulf, Vicksburg and Jackson.

McClelland's advance met the enemy about five miles west of Port Gibson at Thompson's plantation. There was some firing during the night, but nothing rising to the dignity of a battle until daylight. The enemy had taken a strong natural position with most of the Grand Gulf garrison, numbering about seven or eight thousand men, under General Bowen. His hope was to hold me in check until reinforcements under Loring could reach him from Vicksburg; but Loring did not come in time to render much assistance south of Port Gibson. Two brigades of McPherson's corps followed McClelland as fast as rations and ammunition could be issued, and were ready to take position upon the battlefield whenever the 13th corps could be got out of the way.

The country in this part of Mississippi stands on edge, as it were, the roads running along the ridges except when they occasionally pass from one ridge to another. Where there are no clearings the sides of the hills are covered with a very heavy growth of timber and with undergrowth, and the ravines are filled with vines and canebrakes, almost impenetrable. This makes it easy for an inferior force to delay, if not defeat, a far superior one.

Page 44

Near the point selected by Bowen to defend, the road to Port Gibson divides, taking two ridges which do not diverge more than a mile or two at the widest point. These roads unite just outside the town. This made it necessary for McClernand to divide his force. It was not only divided, but it was separated by a deep ravine of the character above described. One flank could not reinforce the other except by marching back to the junction of the roads. McClernand put the divisions of Hovey, Carr and A. J. Smith upon the right-hand branch and Osterhaus on the left. I was on the field by ten A.M., and inspected both flanks in person. On the right the enemy, if not being pressed back, was at least not repulsing our advance. On the left, however, Osterhaus was not faring so well. He had been repulsed with some loss. As soon as the road could be cleared of McClernand's troops I ordered up McPherson, who was close upon the rear of the 13th corps, with two brigades of Logan's division. This was about noon. I ordered him to send one brigade (General John E. Smith's was selected) to support Osterhaus, and to move to the left and flank the enemy out of his position. This movement carried the brigade over a deep ravine to a third ridge and, when Smith's troops were seen well through the ravine, Osterhaus was directed to renew his front attack. It was successful and unattended by heavy loss. The enemy was sent in full retreat on their right, and their left followed before sunset. While the movement to our left was going on, McClernand, who was with his right flank, sent me frequent requests for reinforcements, although the force with him was not being pressed. I had been upon the ground and knew it did not admit of his engaging all the men he had. We followed up our victory until night overtook us about two miles from Port Gibson; then the troops went into bivouac for the night.

CHAPTER XXXIV.

Capture of port Gibson—GRIERSON'S raid—occupation of Grand Gulf —movement up the Big black—battle of Raymond.

We started next morning for Port Gibson as soon as it was light enough to see the road. We were soon in the town, and I was delighted to find that the enemy had not stopped to contest our crossing further at the bridge, which he had burned. The troops were set to work at once to construct a bridge across the South Fork of the Bayou Pierre. At this time the water was high and the current rapid. What might be called a raft-bridge was soon constructed from material obtained from wooden buildings, stables, fences, etc., which sufficed for carrying the whole army over safely. Colonel J. H. Wilson, a member of my staff, planned and superintended the construction of this bridge, going into the water and working as hard as any one engaged. Officers

Page 45

and men generally joined in this work. When it was finished the army crossed and marched eight miles beyond to the North Fork that day. One brigade of Logan's division was sent down the stream to occupy the attention of a rebel battery, which had been left behind with infantry supports to prevent our repairing the burnt railroad bridge. Two of his brigades were sent up the bayou to find a crossing and reach the North Fork to repair the bridge there. The enemy soon left when he found we were building a bridge elsewhere. Before leaving Port Gibson we were reinforced by Crocker's division, McPherson's corps, which had crossed the Mississippi at Bruinsburg and come up without stopping except to get two days' rations. McPherson still had one division west of the Mississippi River, guarding the road from Milliken's Bend to the river below until Sherman's command should relieve it.

On leaving Bruinsburg for the front I left my son Frederick, who had joined me a few weeks before, on board one of the gunboats asleep, and hoped to get away without him until after Grand Gulf should fall into our hands; but on waking up he learned that I had gone, and being guided by the sound of the battle raging at Thompson's Hill—called the Battle of Port Gibson—found his way to where I was. He had no horse to ride at the time, and I had no facilities for even preparing a meal. He, therefore, foraged around the best he could until we reached Grand Gulf. Mr. C. A. Dana, then an officer of the War Department, accompanied me on the Vicksburg campaign and through a portion of the siege. He was in the same situation as Fred so far as transportation and mess arrangements were concerned. The first time I call to mind seeing either of them, after the battle, they were mounted on two enormous horses, grown white from age, each equipped with dilapidated saddles and bridles.

Our trains arrived a few days later, after which we were all perfectly equipped.

My son accompanied me throughout the campaign and siege, and caused no anxiety either to me or to his mother, who was at home. He looked out for himself and was in every battle of the campaign. His age, then not quite thirteen, enabled him to take in all he saw, and to retain a recollection of it that would not be possible in more mature years.

When the movement from Bruinsburg commenced we were without a wagon train. The train still west of the Mississippi was carried around with proper escort, by a circuitous route from Milliken's Bend to Hard Times seventy or more miles below, and did not get up for some days after the battle of Port Gibson. My own horses, headquarters' transportation, servants, mess chest, and everything except what I had on, was with this train. General A. J. Smith happened to have an extra horse at Bruinsburg which I borrowed, with a saddle-tree without upholstering further than stirrups. I had no other for nearly a week.

Page 46

It was necessary to have transportation for ammunition. Provisions could be taken from the country; but all the ammunition that can be carried on the person is soon exhausted when there is much fighting. I directed, therefore, immediately on landing that all the vehicles and draft animals, whether horses, mules, or oxen, in the vicinity should be collected and loaded to their capacity with ammunition. Quite a train was collected during the 30th, and a motley train it was. In it could be found fine carriages, loaded nearly to the top with boxes of cartridges that had been pitched in promiscuously, drawn by mules with plough, harness, straw collars, rope-lines, *etc.*; long-coupled wagons, with racks for carrying cotton bales, drawn by oxen, and everything that could be found in the way of transportation on a plantation, either for use or pleasure. The making out of provision returns was stopped for the time. No formalities were to retard our progress until a position was secured when the time could be spared to observe them.

It was at Port Gibson I first heard through a Southern paper of the complete success of Colonel Grierson, who was making a raid through central Mississippi. He had started from La Grange April 17th with three regiments of about 1,700 men. On the 21st he had detached Colonel Hatch with one regiment to destroy the railroad between Columbus and Macon and then return to La Grange. Hatch had a sharp fight with the enemy at Columbus and retreated along the railroad, destroying it at Okalona and Tupelo, and arriving in La Grange April 26. Grierson continued his movement with about 1,000 men, breaking the Vicksburg and Meridian railroad and the New Orleans and Jackson railroad, arriving at Baton Rouge May 2d. This raid was of great importance, for Grierson had attracted the attention of the enemy from the main movement against Vicksburg.

During the night of the 2d of May the bridge over the North Fork was repaired, and the troops commenced crossing at five the next morning. Before the leading brigade was over it was fired upon by the enemy from a commanding position; but they were soon driven off. It was evident that the enemy was covering a retreat from Grand Gulf to Vicksburg. Every commanding position from this (Grindstone) crossing to Hankinson's ferry over the Big Black was occupied by the retreating foe to delay our progress. McPherson, however, reached Hankinson's ferry before night, seized the ferry boat, and sent a detachment of his command across and several miles north on the road to Vicksburg. When the junction of the road going to Vicksburg with the road from Grand Gulf to Raymond and Jackson was reached, Logan with his division was turned to the left towards Grand Gulf. I went with him a short distance from this junction. McPherson had encountered the largest force yet met since the battle of Port Gibson and had a skirmish nearly approaching a battle; but the road Logan had taken enabled him to come up on the enemy's right flank, and they soon gave way. McPherson was ordered to hold Hankinson's ferry and the road back to Willow Springs with one division; McClernand, who was now in the rear, was to join in this as well as to guard the line back down the bayou. I did not want to take the chances of having an enemy lurking in our rear.

Page 47

On the way from the junction to Grand Gulf, where the road comes into the one from Vicksburg to the same place six or seven miles out, I learned that the last of the enemy had retreated past that place on their way to Vicksburg. I left Logan to make the proper disposition of his troops for the night, while I rode into the town with an escort of about twenty cavalry. Admiral Porter had already arrived with his fleet. The enemy had abandoned his heavy guns and evacuated the place.

When I reached Grand Gulf May 3d I had not been with my baggage since the 27th of April and consequently had had no change of underclothing, no meal except such as I could pick up sometimes at other headquarters, and no tent to cover me. The first thing I did was to get a bath, borrow some fresh underclothing from one of the naval officers and get a good meal on the flag-ship. Then I wrote letters to the general-in-chief informing him of our present position, dispatches to be telegraphed from Cairo, orders to General Sullivan commanding above Vicksburg, and gave orders to all my corps commanders. About twelve o'clock at night I was through my work and started for Hankinson's ferry, arriving there before daylight. While at Grand Gulf I heard from Banks, who was on the Red River, and who said that he could not be at Port Hudson before the 10th of May and then with only 15,000 men. Up to this time my intention had been to secure Grand Gulf, as a base of supplies, detach McClelland's corps to Banks and co-operate with him in the reduction of Port Hudson.

The news from Banks forced upon me a different plan of campaign from the one intended. To wait for his co-operation would have detained me at least a month. The reinforcements would not have reached ten thousand men after deducting casualties and necessary river guards at all high points close to the river for over three hundred miles. The enemy would have strengthened his position and been reinforced by more men than Banks could have brought. I therefore determined to move independently of Banks, cut loose from my base, destroy the rebel force in rear of Vicksburg and invest or capture the city.

Grand Gulf was accordingly given up as a base and the authorities at Washington were notified. I knew well that Halleck's caution would lead him to disapprove of this course; but it was the only one that gave any chance of success. The time it would take to communicate with Washington and get a reply would be so great that I could not be interfered with until it was demonstrated whether my plan was practicable. Even Sherman, who afterwards ignored bases of supplies other than what were afforded by the country while marching through four States of the Confederacy with an army more than twice as large as mine at this time, wrote me from Hankinson's ferry, advising me of the impossibility of supplying our army over a single road. He urged me to "stop all troops till your army is partially

Page 48

supplied with wagons, and then act as quick as possible; for this road will be jammed, as sure as life." To this I replied: "I do not calculate upon the possibility of supplying the army with full rations from Grand Gulf. I know it will be impossible without constructing additional roads. What I do expect is to get up what rations of hard bread, coffee and salt we can, and make the country furnish the balance." We started from Bruinsburg with an average of about two days' rations, and received no more from our own supplies for some days; abundance was found in the mean time. A delay would give the enemy time to reinforce and fortify.

McClernand's and McPherson's commands were kept substantially as they were on the night of the 2d, awaiting supplies sufficient to give them three days' rations in haversacks. Beef, mutton, poultry and forage were found in abundance. Quite a quantity of bacon and molasses was also secured from the country, but bread and coffee could not be obtained in quantity sufficient for all the men. Every plantation, however, had a run of stone, propelled by mule power, to grind corn for the owners and their slaves. All these were kept running while we were stopping, day and night, and when we were marching, during the night, at all plantations covered by the troops. But the product was taken by the troops nearest by, so that the majority of the command was destined to go without bread until a new base was established on the Yazoo above Vicksburg.

While the troops were awaiting the arrival of rations I ordered reconnoissances made by McClernand and McPherson, with the view of leading the enemy to believe that we intended to cross the Big Black and attack the city at once.

On the 6th Sherman arrived at Grand Gulf and crossed his command that night and the next day. Three days' rations had been brought up from Grand Gulf for the advanced troops and were issued. Orders were given for a forward movement the next day. Sherman was directed to order up Blair, who had been left behind to guard the road from Milliken's Bend to Hard Times with two brigades.

The quartermaster at Young's Point was ordered to send two hundred wagons with Blair, and the commissary was to load them with hard bread, coffee, sugar, salt and one hundred thousand pounds of salt meat.

On the 3d Hurlbut, who had been left at Memphis, was ordered to send four regiments from his command to Milliken's Bend to relieve Blair's division, and on the 5th he was ordered to send Lauman's division in addition, the latter to join the army in the field. The four regiments were to be taken from troops near the river so that there would be no delay.

Page 49

During the night of the 6th McPherson drew in his troops north of the Big Black and was off at an early hour on the road to Jackson, via Rocky Springs, Utica and Raymond. That night he and McClernand were both at Rocky Springs ten miles from Hankinson's ferry. McPherson remained there during the 8th, while McClernand moved to Big Sandy and Sherman marched from Grand Gulf to Hankinson's ferry. The 9th, McPherson moved to a point within a few miles west of Utica; McClernand and Sherman remained where they were. On the 10th McPherson moved to Utica, Sherman to Big Sandy; McClernand was still at Big Sandy. The 11th, McClernand was at Five Mile Creek; Sherman at Auburn; McPherson five miles advanced from Utica. May 12th, McClernand was at Fourteen Mile Creek; Sherman at Fourteen Mile Creek; McPherson at Raymond after a battle.

After McPherson crossed the Big Black at Hankinson's ferry Vicksburg could have been approached and besieged by the south side. It is not probable, however, that Pemberton would have permitted a close besiegement. The broken nature of the ground would have enabled him to hold a strong defensible line from the river south of the city to the Big Black, retaining possession of the railroad back to that point. It was my plan, therefore, to get to the railroad east of Vicksburg, and approach from that direction. Accordingly, McPherson's troops that had crossed the Big Black were withdrawn and the movement east to Jackson commenced.

As has been stated before, the country is very much broken and the roads generally confined to the tops of the hills. The troops were moved one (sometimes two) corps at a time to reach designated points out parallel to the railroad and only from six to ten miles from it. McClernand's corps was kept with its left flank on the Big Black guarding all the crossings. Fourteen Mile Creek, a stream substantially parallel with the railroad, was reached and crossings effected by McClernand and Sherman with slight loss. McPherson was to the right of Sherman, extending to Raymond. The cavalry was used in this advance in reconnoitring to find the roads: to cover our advances and to find the most practicable routes from one command to another so they could support each other in case of an attack. In making this move I estimated Pemberton's movable force at Vicksburg at about eighteen thousand men, with smaller forces at Haines' Bluff and Jackson. It would not be possible for Pemberton to attack me with all his troops at one place, and I determined to throw my army between his and fight him in detail. This was done with success, but I found afterwards that I had entirely under-estimated Pemberton's strength.

Page 50

Up to this point our movements had been made without serious opposition. My line was now nearly parallel with the Jackson and Vicksburg railroad and about seven miles south of it. The right was at Raymond eighteen miles from Jackson, McPherson commanding; Sherman in the centre on Fourteen Mile Creek, his advance thrown across; McClernand to the left, also on Fourteen Mile Creek, advance across, and his pickets within two miles of Edward's station, where the enemy had concentrated a considerable force and where they undoubtedly expected us to attack. McClernand's left was on the Big Black. In all our moves, up to this time, the left had hugged the Big Black closely, and all the ferries had been guarded to prevent the enemy throwing a force on our rear.

McPherson encountered the enemy, five thousand strong with two batteries under General Gregg, about two miles out of Raymond. This was about two P.M. Logan was in advance with one of his brigades. He deployed and moved up to engage the enemy. McPherson ordered the road in rear to be cleared of wagons, and the balance of Logan's division, and Crocker's, which was still farther in rear, to come forward with all dispatch. The order was obeyed with alacrity. Logan got his division in position for assault before Crocker could get up, and attacked with vigor, carrying the enemy's position easily, sending Gregg flying from the field not to appear against our front again until we met at Jackson.

In this battle McPherson lost 66 killed, 339 wounded, and 37 missing —nearly or quite all from Logan's division. The enemy's loss was 100 killed, 305 wounded, besides 415 taken prisoners.

I regarded Logan and Crocker as being as competent division commanders as could be found in or out of the army and both equal to a much higher command. Crocker, however, was dying of consumption when he volunteered. His weak condition never put him on the sick report when there was a battle in prospect, as long as he could keep on his feet. He died not long after the close of the rebellion.

CHAPTER XXXV.

Movement against Jackson—fall of Jackson—intercepting the enemy —battle of Champion's hill.

When the news reached me of McPherson's victory at Raymond about sundown my position was with Sherman. I decided at once to turn the whole column towards Jackson and capture that place without delay.

Pemberton was now on my left, with, as I supposed, about 18,000 men; in fact, as I learned afterwards, with nearly 50,000. A force was also collecting on my right, at Jackson, the point where all the railroads communicating with Vicksburg connect. All

the enemy's supplies of men and stores would come by that point. As I hoped in the end to besiege Vicksburg I must first destroy all possibility of aid.

Page 51

I therefore determined to move swiftly towards Jackson, destroy or drive any force in that direction and then turn upon Pemberton. But by moving against Jackson, I uncovered my own communication. So I finally decided to have none—to cut loose altogether from my base and move my whole force eastward. I then had no fears for my communications, and if I moved quickly enough could turn upon Pemberton before he could attack me in the rear.

Accordingly, all previous orders given during the day for movements on the 13th were annulled by new ones. McPherson was ordered at daylight to move on Clinton, ten miles from Jackson; Sherman was notified of my determination to capture Jackson and work from there westward. He was ordered to start at four in the morning and march to Raymond. McClernand was ordered to march with three divisions by Dillon's to Raymond. One was left to guard the crossing of the Big Black.

On the 10th I had received a letter from Banks, on the Red River, asking reinforcements. Porter had gone to his assistance with a part of his fleet on the 3d, and I now wrote to him describing my position and declining to send any troops. I looked upon side movements as long as the enemy held Port Hudson and Vicksburg as a waste of time and material.

General Joseph E. Johnston arrived at Jackson in the night of the 13th from Tennessee, and immediately assumed command of all the Confederate troops in Mississippi. I knew he was expecting reinforcements from the south and east. On the 6th I had written to General Halleck: "Information from the other side leaves me to believe the enemy are bringing forces from Tullahoma."

Up to this time my troops had been kept in supporting distances of each other, as far as the nature of the country would admit. Reconnoissances were constantly made from each corps to enable them to acquaint themselves with the most practicable routes from one to another in case a union became necessary.

McPherson reached Clinton with the advance early on the 13th and immediately set to work destroying the railroad. Sherman's advance reached Raymond before the last of McPherson's command had got out of the town. McClernand withdrew from the front of the enemy, at Edward's station, with much skill and without loss, and reached his position for the night in good order. On the night of the 13th, McPherson was ordered to march at early dawn upon Jackson, only fifteen miles away. Sherman was given the same order; but he was to move by the direct road from Raymond to Jackson, which is south of the road McPherson was on and does not approach within two miles of it at the point where it crossed the line of intrenchments which, at that time, defended the city. McClernand was ordered to move one division of his command to Clinton, one division

a few miles beyond Mississippi Springs following Sherman's line, and a third to Raymond. He was also directed to send his siege guns, four in number with the troops

Page 52

going by Mississippi Springs. McClelland's position was an advantageous one in any event. With one division at Clinton he was in position to reinforce McPherson, at Jackson, rapidly if it became necessary; the division beyond Mississippi Springs was equally available to reinforce Sherman; the one at Raymond could take either road. He still had two other divisions farther back now that Blair had come up, available within a day at Jackson. If this last command should not be wanted at Jackson, they were already one day's march from there on their way to Vicksburg and on three different roads leading to the latter city. But the most important consideration in my mind was to have a force confronting Pemberton if he should come out to attack my rear. This I expected him to do; as shown further on, he was directed by Johnston to make this very move.

I notified General Halleck that I should attack the State capital on the 14th. A courier carried the dispatch to Grand Gulf through an unprotected country.

Sherman and McPherson communicated with each other during the night and arranged to reach Jackson at about the same hour. It rained in torrents during the night of the 13th and the fore part of the day of the 14th. The roads were intolerable, and in some places on Sherman's line, where the land was low, they were covered more than a foot deep with water. But the troops never murmured. By nine o'clock Crocker, of McPherson's corps, who was now in advance, came upon the enemy's pickets and speedily drove them in upon the main body. They were outside of the intrenchments in a strong position, and proved to be the troops that had been driven out of Raymond. Johnston had been reinforced; during the night by Georgia and South Carolina regiments, so that his force amounted to eleven thousand men, and he was expecting still more.

Sherman also came upon the rebel pickets some distance out from the town, but speedily drove them in. He was now on the south and south-west of Jackson confronting the Confederates behind their breastworks, while McPherson's right was nearly two miles north, occupying a line running north and south across the Vicksburg railroad. Artillery was brought up and reconnoissances made preparatory to an assault. McPherson brought up Logan's division while he deployed Crocker's for the assault. Sherman made similar dispositions on the right. By eleven A.M. both were ready to attack. Crocker moved his division forward, preceded by a strong skirmish line. These troops at once encountered the enemy's advance and drove it back on the main body, when they returned to their proper regiment and the whole division charged, routing the enemy completely and driving him into this main line. This stand by the enemy was made more than two miles outside of his main fortifications. McPherson followed up with his command until within range of the guns of the enemy from their intrenchments, when he halted to bring his troops into line and reconnoitre to determine the next move. It was now about noon.

Page 53

While this was going on Sherman was confronting a rebel battery which enfiladed the road on which he was marching—the Mississippi Springs road—and commanded a bridge spanning a stream over which he had to pass. By detaching right and left the stream was forced and the enemy flanked and speedily driven within the main line. This brought our whole line in front of the enemy's line of works, which was continuous on the north, west and south sides from the Pearl River north of the city to the same river south. I was with Sherman. He was confronted by a force sufficient to hold us back. Appearances did not justify an assault where we were. I had directed Sherman to send a force to the right, and to reconnoitre as far as to the Pearl River. This force, Tuttle's division, not returning I rode to the right with my staff, and soon found that the enemy had left that part of the line. Tuttle's movement or McPherson's pressure had no doubt led Johnston to order a retreat, leaving only the men at the guns to retard us while he was getting away. Tuttle had seen this and, passing through the lines without resistance, came up in the rear of the artillerists confronting Sherman and captured them with ten pieces of artillery. I rode immediately to the State House, where I was soon followed by Sherman. About the same time McPherson discovered that the enemy was leaving his front, and advanced Crocker, who was so close upon the enemy that they could not move their guns or destroy them. He captured seven guns and, moving on, hoisted the National flag over the rebel capital of Mississippi. Stevenson's brigade was sent to cut off the rebel retreat, but was too late or not expeditious enough.

Our loss in this engagement was: McPherson, 37 killed, 228 wounded; Sherman, 4 killed and 21 wounded and missing. The enemy lost 845 killed, wounded and captured. Seventeen guns fell into our hands, and the enemy destroyed by fire their store-houses, containing a large amount of commissary stores.

On this day Blair reached New Auburn and joined McClelland's 4th division. He had with him two hundred wagons loaded with rations, the only commissary supplies received during the entire campaign.

I slept that night in the room that Johnston was said to have occupied the night before.

About four in the afternoon I sent for the corps commanders and directed the dispositions to be made of their troops. Sherman was to remain in Jackson until he destroyed that place as a railroad centre, and manufacturing city of military supplies. He did the work most effectually. Sherman and I went together into a manufactory which had not ceased work on account of the battle nor for the entrance of Yankee troops. Our presence did not seem to attract the attention of either the manager or the operatives, most of whom were girls. We looked on for a while to see the tent cloth which they were making roll out of the looms, with "C. S. A."

Page 54

woven in each bolt. There was an immense amount of cotton, in bales, stacked outside. Finally I told Sherman I thought they had done work enough. The operatives were told they could leave and take with them what cloth they could carry. In a few minutes cotton and factory were in a blaze. The proprietor visited Washington while I was President to get his pay for this property, claiming that it was private. He asked me to give him a statement of the fact that his property had been destroyed by National troops, so that he might use it with Congress where he was pressing, or proposed to press, his claim. I declined.

On the night of the 13th Johnston sent the following dispatch to Pemberton at Edward's station: "I have lately arrived, and learn that Major-General Sherman is between us with four divisions at Clinton. It is important to establish communication, that you may be reinforced. If practicable, come up in his rear at once. To beat such a detachment would be of immense value. All the troops you can quickly assemble should be brought. Time is all-important." This dispatch was sent in triplicate, by different messengers. One of the messengers happened to be a loyal man who had been expelled from Memphis some months before by Hurlbut for uttering disloyal and threatening sentiments. There was a good deal of parade about his expulsion, ostensibly as a warning to those who entertained the sentiments he expressed; but Hurlbut and the expelled man understood each other. He delivered his copy of Johnston's dispatch to McPherson who forwarded it to me.

Receiving this dispatch on the 14th I ordered McPherson to move promptly in the morning back to Bolton, the nearest point where Johnston could reach the road. Bolton is about twenty miles west of Jackson. I also informed McClernand of the capture of Jackson and sent him the following order: "It is evidently the design of the enemy to get north of us and cross the Big Black, and beat us into Vicksburg. We must not allow them to do this. Turn all your forces towards Bolton station, and make all dispatch in getting there. Move troops by the most direct road from wherever they may be on the receipt of this order."

And to Blair I wrote: "Their design is evidently to cross the Big Black and pass down the peninsula between the Big Black and Yazoo rivers. We must beat them. Turn your troops immediately to Bolton; take all the trains with you. Smith's division, and any other troops now with you, will go to the same place. If practicable, take parallel roads, so as to divide your troops and train."

Johnston stopped on the Canton road only six miles north of Jackson, the night of the 14th. He sent from there to Pemberton dispatches announcing the loss of Jackson, and the following order:

“As soon as the reinforcements are all up, they must be united to the rest of the army. I am anxious to see a force assembled that may be able to inflict a heavy blow upon the enemy. Can Grant supply himself from the Mississippi? Can you not cut him off from it, and above all, should he be compelled to fall back for want of supplies, beat him.”

Page 55

The concentration of my troops was easy, considering the character of the country. McPherson moved along the road parallel with and near the railroad. McClelland's command was, one division (Hovey's) on the road McPherson had to take, but with a start of four miles. One (Osterhaus) was at Raymond, on a converging road that intersected the other near Champion's Hill; one (Carr's) had to pass over the same road with Osterhaus, but being back at Mississippi Springs, would not be detained by it; the fourth (Smith's) with Blair's division, was near Auburn with a different road to pass over. McClelland faced about and moved promptly. His cavalry from Raymond seized Bolton by half-past nine in the morning, driving out the enemy's pickets and capturing several men.

The night of the 15th Hovey was at Bolton; Carr and Osterhaus were about three miles south, but abreast, facing west; Smith was north of Raymond with Blair in his rear.

McPherson's command, with Logan in front, had marched at seven o'clock, and by four reached Hovey and went into camp; Crocker bivouacked just in Hovey's rear on the Clinton road. Sherman with two divisions, was in Jackson, completing the destruction of roads, bridges and military factories. I rode in person out to Clinton. On my arrival I ordered McClelland to move early in the morning on Edward's station, cautioning him to watch for the enemy and not bring on an engagement unless he felt very certain of success.

I naturally expected that Pemberton would endeavor to obey the orders of his superior, which I have shown were to attack us at Clinton. This, indeed, I knew he could not do; but I felt sure he would make the attempt to reach that point. It turned out, however, that he had decided his superior's plans were impracticable, and consequently determined to move south from Edward's station and get between me and my base. I, however, had no base, having abandoned it more than a week before. On the 15th Pemberton had actually marched south from Edward's station, but the rains had swollen Baker's Creek, which he had to cross so much that he could not ford it, and the bridges were washed away. This brought him back to the Jackson road, on which there was a good bridge over Baker's Creek. Some of his troops were marching until midnight to get there. Receiving here early on the 16th a repetition of his order to join Johnston at Clinton, he concluded to obey, and sent a dispatch to his chief, informing him of the route by which he might be expected.

About five o'clock in the morning (16th) two men, who had been employed on the Jackson and Vicksburg railroad, were brought to me. They reported that they had passed through Pemberton's army in the night, and that it was still marching east. They reported him to have eighty regiments of infantry and ten batteries; in all, about twenty-five thousand men.

Page 56

I had expected to leave Sherman at Jackson another day in order to complete his work; but getting the above information I sent him orders to move with all dispatch to Bolton, and to put one division with an ammunition train on the road at once, with directions to its commander to march with all possible speed until he came up to our rear. Within an hour after receiving this order Steele's division was on the road. At the same time I dispatched to Blair, who was near Auburn, to move with all speed to Edward's station. McClernand was directed to embrace Blair in his command for the present. Blair's division was a part of the 15th army corps (Sherman's); but as it was on its way to join its corps, it naturally struck our left first, now that we had faced about and were moving west. The 15th corps, when it got up, would be on our extreme right. McPherson was directed to get his trains out of the way of the troops, and to follow Hovey's division as closely as possible. McClernand had two roads about three miles apart, converging at Edward's station, over which to march his troops. Hovey's division of his corps had the advance on a third road (the Clinton) still farther north. McClernand was directed to move Blair's and A. J. Smith's divisions by the southernmost of these roads, and Osterhaus and Carr by the middle road. Orders were to move cautiously with skirmishers to the front to feel for the enemy.

Smith's division on the most southern road was the first to encounter the enemy's pickets, who were speedily driven in. Osterhaus, on the middle road, hearing the firing, pushed his skirmishers forward, found the enemy's pickets and forced them back to the main line. About the same time Hovey encountered the enemy on the northern or direct wagon road from Jackson to Vicksburg. McPherson was hastening up to join Hovey, but was embarrassed by Hovey's trains occupying the roads. I was still back at Clinton. McPherson sent me word of the situation, and expressed the wish that I was up. By half-past seven I was on the road and proceeded rapidly to the front, ordering all trains that were in front of troops off the road. When I arrived Hovey's skirmishing amounted almost to a battle.

McClernand was in person on the middle road and had a shorter distance to march to reach the enemy's position than McPherson. I sent him word by a staff officer to push forward and attack. These orders were repeated several times without apparently expediting McClernand's advance.

Champion's Hill, where Pemberton had chosen his position to receive us, whether taken by accident or design, was well selected. It is one of the highest points in that section, and commanded all the ground in range. On the east side of the ridge, which is quite precipitous, is a ravine running first north, then westerly, terminating at Baker's Creek. It was grown up thickly with large trees and undergrowth, making it difficult to penetrate

Page 57

with troops, even when not defended. The ridge occupied by the enemy terminated abruptly where the ravine turns westerly. The left of the enemy occupied the north end of this ridge. The Bolton and Edward's station wagon-road turns almost due south at this point and ascends the ridge, which it follows for about a mile; then turning west, descends by a gentle declivity to Baker's Creek, nearly a mile away. On the west side the slope of the ridge is gradual and is cultivated from near the summit to the creek. There was, when we were there, a narrow belt of timber near the summit west of the road.

From Raymond there is a direct road to Edward's station, some three miles west of Champion's Hill. There is one also to Bolton. From this latter road there is still another, leaving it about three and a half miles before reaching Bolton and leads direct to the same station. It was along these two roads that three divisions of McClernand's corps, and Blair of Sherman's, temporarily under McClernand, were moving. Hovey of McClernand's command was with McPherson, farther north on the road from Bolton direct to Edward's station. The middle road comes into the northern road at the point where the latter turns to the west and descends to Baker's Creek; the southern road is still several miles south and does not intersect the others until it reaches Edward's station. Pemberton's lines covered all these roads, and faced east. Hovey's line, when it first drove in the enemy's pickets, was formed parallel to that of the enemy and confronted his left.

By eleven o'clock the skirmishing had grown into a hard-contested battle. Hovey alone, before other troops could be got to assist him, had captured a battery of the enemy. But he was not able to hold his position and had to abandon the artillery. McPherson brought up his troops as fast as possible, Logan in front, and posted them on the right of Hovey and across the flank of the enemy. Logan reinforced Hovey with one brigade from his division; with his other two he moved farther west to make room for Crocker, who was coming up as rapidly as the roads would admit. Hovey was still being heavily pressed, and was calling on me for more reinforcements. I ordered Crocker, who was now coming up, to send one brigade from his division. McPherson ordered two batteries to be stationed where they nearly enfiladed the enemy's line, and they did good execution.

From Logan's position now a direct forward movement carried him over open fields, in rear of the enemy and in a line parallel with them. He did make exactly this move, attacking, however, the enemy through the belt of woods covering the west slope of the hill for a short distance. Up to this time I had kept my position near Hovey where we were the most heavily pressed; but about noon I moved with a part of my staff by our right around, until I came up with Logan himself. I found him near the road leading down to Baker's

Page 58

Creek. He was actually in command of the only road over which the enemy could retreat; Hovey, reinforced by two brigades from McPherson's command, confronted the enemy's left; Crocker, with two brigades, covered their left flank; McClernand two hours before, had been within two miles and a half of their centre with two divisions, and the two divisions, Blair's and A. J. Smith's, were confronting the rebel right; Ransom, with a brigade of McArthur's division of the 17th corps (McPherson's), had crossed the river at Grand Gulf a few days before, and was coming up on their right flank. Neither Logan nor I knew that we had cut off the retreat of the enemy. Just at this juncture a messenger came from Hovey, asking for more reinforcements. There were none to spare. I then gave an order to move McPherson's command by the left flank around to Hovey. This uncovered the rebel line of retreat, which was soon taken advantage of by the enemy.

During all this time, Hovey, reinforced as he was by a brigade from Logan and another from Crocker, and by Crocker gallantly coming up with two other brigades on his right, had made several assaults, the last one about the time the road was opened to the rear. The enemy fled precipitately. This was between three and four o'clock. I rode forward, or rather back, to where the middle road intersects the north road, and found the skirmishers of Carr's division just coming in. Osterhaus was farther south and soon after came up with skirmishers advanced in like manner. Hovey's division, and McPherson's two divisions with him, had marched and fought from early dawn, and were not in the best condition to follow the retreating foe. I sent orders to Osterhaus to pursue the enemy, and to Carr, whom I saw personally, I explained the situation and directed him to pursue vigorously as far as the Big Black, and to cross it if he could; Osterhaus to follow him. The pursuit was continued until after dark.

The battle of Champion's Hill lasted about four hours, hard fighting, preceded by two or three hours of skirmishing, some of which almost rose to the dignity of battle. Every man of Hovey's division and of McPherson's two divisions was engaged during the battle. No other part of my command was engaged at all, except that as described before. Osterhaus's and A. J. Smith's divisions had encountered the rebel advanced pickets as early as half-past seven. Their positions were admirable for advancing upon the enemy's line. McClernand, with two divisions, was within a few miles of the battlefield long before noon and in easy hearing. I sent him repeated orders by staff officers fully competent to explain to him the situation. These traversed the wood separating us, without escort, and directed him to push forward; but he did not come. It is true, in front of McClernand there was a small force of the enemy and posted in a good position behind a ravine obstructing his advance; but if he had moved

Page 59

to the right by the road my staff officers had followed the enemy must either have fallen back or been cut off. Instead of this he sent orders to Hovey, who belonged to his corps, to join on to his right flank. Hovey was bearing the brunt of the battle at the time. To obey the order he would have had to pull out from the front of the enemy and march back as far as McClernand had to advance to get into battle and substantially over the same ground. Of course I did not permit Hovey to obey the order of his intermediate superior.

We had in this battle about 15,000 men absolutely engaged. This excludes those that did not get up, all of McClernand's command except Hovey. Our loss was 410 killed, 1,844 wounded and 187 missing. Hovey alone lost 1,200 killed, wounded and missing—more than one-third of his division.

Had McClernand come up with reasonable promptness, or had I known the ground as I did afterwards, I cannot see how Pemberton could have escaped with any organized force. As it was he lost over three thousand killed and wounded and about three thousand captured in battle and in pursuit. Loring's division, which was the right of Pemberton's line, was cut off from the retreating army and never got back into Vicksburg. Pemberton himself fell back that night to the Big Black River. His troops did not stop before midnight and many of them left before the general retreat commenced, and no doubt a good part of them returned to their homes. Logan alone captured 1,300 prisoners and eleven guns. Hovey captured 300 under fire and about 700 in all, exclusive of 500 sick and wounded whom he paroled, thus making 1,200.

McPherson joined in the advance as soon as his men could fill their cartridge-boxes, leaving one brigade to guard our wounded. The pursuit was continued as long as it was light enough to see the road. The night of the 16th of May found McPherson's command bivouacked from two to six miles west of the battlefield, along the line of the road to Vicksburg. Carr and Osterhaus were at Edward's station, and Blair was about three miles south-east; Hovey remained on the field where his troops had fought so bravely and bled so freely. Much war material abandoned by the enemy was picked up on the battle-field, among it thirty pieces of artillery. I pushed through the advancing column with my staff and kept in advance until after night. Finding ourselves alone we stopped and took possession of a vacant house. As no troops came up we moved back a mile or more until we met the head of the column just going into bivouac on the road. We had no tents, so we occupied the porch of a house which had been taken for a rebel hospital and which was filled with wounded and dying who had been brought from the battle-field we had just left.

While a battle is raging one can see his enemy mowed down by the thousand, or the ten thousand, with great composure; but after the battle these scenes are distressing,

and one is naturally disposed to do as much to alleviate the suffering of an enemy as a friend.

Page 60

CHAPTER XXXVI.

Battle of black river bridge—crossing the Big black—investment of Vicksburg—assaulting the works.

We were now assured of our position between Johnston and Pemberton, without a possibility of a junction of their forces. Pemberton might have made a night march to the Big Black, crossed the bridge there and, by moving north on the west side, have eluded us and finally returned to Johnston. But this would have given us Vicksburg. It would have been his proper move, however, and the one Johnston would have made had he been in Pemberton's place. In fact it would have been in conformity with Johnston's orders to Pemberton.

Sherman left Jackson with the last of his troops about noon on the 16th and reached Bolton, twenty miles west, before halting. His rear guard did not get in until two A.M. the 17th, but renewed their march by daylight. He paroled his prisoners at Jackson, and was forced to leave his own wounded in care of surgeons and attendants. At Bolton he was informed of our victory. He was directed to commence the march early next day, and to diverge from the road he was on to Bridgeport on the Big Black River, some eleven miles above the point where we expected to find the enemy. Blair was ordered to join him there with the pontoon train as early as possible.

This movement brought Sherman's corps together, and at a point where I hoped a crossing of the Big Black might be effected and Sherman's corps used to flank the enemy out of his position in our front, thus opening a crossing for the remainder of the army. I informed him that I would endeavor to hold the enemy in my front while he crossed the river.

The advance division, Carr's (McClelland's corps), resumed the pursuit at half-past three A.M. on the 17th, followed closely by Osterhaus, McPherson bringing up the rear with his corps. As I expected, the enemy was found in position on the Big Black. The point was only six miles from that where my advance had rested for the night, and was reached at an early hour. Here the river makes a turn to the west, and has washed close up to the high land; the east side is a low bottom, sometimes overflowed at very high water, but was cleared and in cultivation. A bayou runs irregularly across this low land, the bottom of which, however, is above the surface of the Big Black at ordinary stages. When the river is full water runs through it, converting the point of land into an island. The bayou was grown up with timber, which the enemy had felled into the ditch. At this time there was a foot or two of water in it. The rebels had constructed a parapet along the inner bank of this bayou by using cotton bales from the plantation close by and throwing dirt over them. The whole was thoroughly commanded

Page 61

from the height west of the river. At the upper end of the bayou there was a strip of uncleared land which afforded a cover for a portion of our men. Carr's division was deployed on our right, Lawler's brigade forming his extreme right and reaching through these woods to the river above. Osterhaus' division was deployed to the left of Carr and covered the enemy's entire front. McPherson was in column on the road, the head close by, ready to come in wherever he could be of assistance.

While the troops were standing as here described an officer from Banks' staff came up and presented me with a letter from General Halleck, dated the 11th of May. It had been sent by the way of New Orleans to Banks to be forwarded to me. It ordered me to return to Grand Gulf and to co-operate from there with Banks against Port Hudson, and then to return with our combined forces to besiege Vicksburg. I told the officer that the order came too late, and that Halleck would not give it now if he knew our position. The bearer of the dispatch insisted that I ought to obey the order, and was giving arguments to support his position when I heard great cheering to the right of our line and, looking in that direction, saw Lawler in his shirt sleeves leading a charge upon the enemy. I immediately mounted my horse and rode in the direction of the charge, and saw no more of the officer who delivered the dispatch; I think not even to this day.

The assault was successful. But little resistance was made. The enemy fled from the west bank of the river, burning the bridge behind him and leaving the men and guns on the east side to fall into our hands. Many tried to escape by swimming the river. Some succeeded and some were drowned in the attempt. Eighteen guns were captured and 1,751 prisoners. Our loss was 39 killed, 237 wounded and 3 missing. The enemy probably lost but few men except those captured and drowned. But for the successful and complete destruction of the bridge, I have but little doubt that we should have followed the enemy so closely as to prevent his occupying his defences around Vicksburg.

As the bridge was destroyed and the river was high, new bridges had to be built. It was but little after nine o'clock A.M. when the capture took place. As soon as work could be commenced, orders were given for the construction of three bridges. One was taken charge of by Lieutenant Hains, of the Engineer Corps, one by General McPherson himself and one by General Ransom, a most gallant and intelligent volunteer officer. My recollection is that Hains built a raft bridge; McPherson a pontoon, using cotton bales in large numbers, for pontoons; and that Ransom felled trees on opposite banks of the river, cutting only on one side of the tree, so that they would fall with their tops interlacing in the river, without the trees being entirely severed from their stumps. A bridge was then made with these trees to support the roadway. Lumber was taken from buildings, cotton gins and wherever found, for this purpose. By eight o'clock in the morning of the 18th all three bridges were complete and the troops were crossing.

Page 62

Sherman reached Bridgeport about noon of the 17th and found Blair with the pontoon train already there. A few of the enemy were intrenched on the west bank, but they made little resistance and soon surrendered. Two divisions were crossed that night and the third the following morning.

On the 18th I moved along the Vicksburg road in advance of the troops and as soon as possible joined Sherman. My first anxiety was to secure a base of supplies on the Yazoo River above Vicksburg. Sherman's line of march led him to the very point on Walnut Hills occupied by the enemy the December before when he was repulsed. Sherman was equally anxious with myself. Our impatience led us to move in advance of the column and well up with the advanced skirmishers. There were some detached works along the crest of the hill. These were still occupied by the enemy, or else the garrison from Haines' Bluff had not all got past on their way to Vicksburg. At all events the bullets of the enemy whistled by thick and fast for a short time. In a few minutes Sherman had the pleasure of looking down from the spot coveted so much by him the December before on the ground where his command had lain so helpless for offensive action. He turned to me, saying that up to this minute he had felt no positive assurance of success. This, however, he said was the end of one of the greatest campaigns in history and I ought to make a report of it at once. Vicksburg was not yet captured, and there was no telling what might happen before it was taken; but whether captured or not, this was a complete and successful campaign. I do not claim to quote Sherman's language; but the substance only. My reason for mentioning this incident will appear further on.

McPherson, after crossing the Big Black, came into the Jackson and Vicksburg road which Sherman was on, but to his rear. He arrived at night near the lines of the enemy, and went into camp. McClernand moved by the direct road near the railroad to Mount Albans, and then turned to the left and put his troops on the road from Baldwin's ferry to Vicksburg. This brought him south of McPherson. I now had my three corps up the works built for the defence of Vicksburg, on three roads—one to the north, one to the east and one to the south-east of the city. By the morning of the 19th the investment was as complete as my limited number of troops would allow. Sherman was on the right, and covered the high ground from where it overlooked the Yazoo as far south-east as his troops would extend. McPherson joined on to his left, and occupied ground on both sides of the Jackson road. McClernand took up the ground to his left and extended as far towards Warrenton as he could, keeping a continuous line.

On the 19th there was constant skirmishing with the enemy while we were getting into better position. The enemy had been much demoralized by his defeats at Champion's Hill and the Big Black, and I believed he would not make much effort to hold Vicksburg. Accordingly, at two o'clock I ordered an assault. It resulted in securing more advanced positions for all our troops where they were fully covered from the fire of the enemy.

Page 63

The 20th and 21st were spent in strengthening our position and in making roads in rear of the army, from Yazoo River or Chickasaw Bayou. Most of the army had now been for three weeks with only five days' rations issued by the commissary. They had an abundance of food, however, but began to feel the want of bread. I remember that in passing around to the left of the line on the 21st, a soldier, recognizing me, said in rather a low voice, but yet so that I heard him, "Hard tack." In a moment the cry was taken up all along the line, "Hard tack! Hard tack!" I told the men nearest to me that we had been engaged ever since the arrival of the troops in building a road over which to supply them with everything they needed. The cry was instantly changed to cheers. By the night of the 21st all the troops had full rations issued to them. The bread and coffee were highly appreciated.

I now determined on a second assault. Johnston was in my rear, only fifty miles away, with an army not much inferior in numbers to the one I had with me, and I knew he was being reinforced. There was danger of his coming to the assistance of Pemberton, and after all he might defeat my anticipations of capturing the garrison if, indeed, he did not prevent the capture of the city. The immediate capture of Vicksburg would save sending me the reinforcements which were so much wanted elsewhere, and would set free the army under me to drive Johnston from the State. But the first consideration of all was—the troops believed they could carry the works in their front, and would not have worked so patiently in the trenches if they had not been allowed to try.

The attack was ordered to commence on all parts of the line at ten o'clock A.M. on the 22d with a furious cannonade from every battery in position. All the corps commanders set their time by mine so that all might open the engagement at the same minute. The attack was gallant, and portions of each of the three corps succeeded in getting up to the very parapets of the enemy and in planting their battle flags upon them; but at no place were we able to enter. General McClernand reported that he had gained the enemy's intrenchments at several points, and wanted reinforcements. I occupied a position from which I believed I could see as well as he what took place in his front, and I did not see the success he reported. But his request for reinforcements being repeated I could not ignore it, and sent him Quinby's division of the 17th corps. Sherman and McPherson were both ordered to renew their assaults as a diversion in favor of McClernand. This last attack only served to increase our casualties without giving any benefit whatever. As soon as it was dark our troops that had reached the enemy's line and been obliged to remain there for security all day, were withdrawn; and thus ended the last assault upon Vicksburg.

CHAPTER XXXVII

Page 64

Siege of Vicksburg.

I now determined upon a regular siege—to “out-camp the enemy,” as it were, and to incur no more losses. The experience of the 22d convinced officers and men that this was best, and they went to work on the defences and approaches with a will. With the navy holding the river, the investment of Vicksburg was complete. As long as we could hold our position the enemy was limited in supplies of food, men and munitions of war to what they had on hand. These could not last always.

The crossing of troops at Bruinsburg commenced April 30th. On the 18th of May the army was in rear of Vicksburg. On the 19th, just twenty days after the crossing, the city was completely invested and an assault had been made: five distinct battles (besides continuous skirmishing) had been fought and won by the Union forces; the capital of the State had fallen and its arsenals, military manufactories and everything useful for military purposes had been destroyed; an average of about one hundred and eighty miles had been marched by the troops engaged; but five days’ rations had been issued, and no forage; over six thousand prisoners had been captured, and as many more of the enemy had been killed or wounded; twenty-seven heavy cannon and sixty-one field-pieces had fallen into our hands; and four hundred miles of the river, from Vicksburg to Port Hudson, had become ours. The Union force that had crossed the Mississippi River up to this time was less than forty-three thousand men. One division of these, Blair’s, only arrived in time to take part in the battle of Champion’s Hill, but was not engaged there; and one brigade, Ransom’s of McPherson’s corps, reached the field after the battle. The enemy had at Vicksburg, Grand Gulf, Jackson, and on the roads between these places, over sixty thousand men. They were in their own country, where no rear guards were necessary. The country is admirable for defence, but difficult for the conduct of an offensive campaign. All their troops had to be met. We were fortunate, to say the least, in meeting them in detail: at Port Gibson seven or eight thousand; at Raymond, five thousand; at Jackson, from eight to eleven thousand; at Champion’s Hill, twenty-five thousand; at the Big Black, four thousand. A part of those met at Jackson were all that was left of those encountered at Raymond. They were beaten in detail by a force smaller than their own, upon their own ground. Our loss up to this time was:

Killed wounded missing

Port Gibson.....	131	719	25
South Fork Bayou Pierre.....	..	1	..
Skirmishes, May 3	1	9	..
Fourteen Mile Creek.....	6	24	..
Raymond.....	66	339	39
Jackson.....	42	251	7
Champion’s Hill.....	410	1,844	187
Big Black.....	39	237	3

Bridgeport.....	..	1	..
Total.....	695	3,425	259

Of the wounded many were but slightly so, and continued on duty. Not half of them were disabled for any length of time.

Page 65

After the unsuccessful assault of the 22d the work of the regular siege began. Sherman occupied the right starting from the river above Vicksburg, McPherson the centre (McArthur's division now with him) and McClernand the left, holding the road south to Warrenton. Lauman's division arrived at this time and was placed on the extreme left of the line.

In the interval between the assaults of the 19th and 22d, roads had been completed from the Yazoo River and Chickasaw Bayou, around the rear of the army, to enable us to bring up supplies of food and ammunition; ground had been selected and cleared on which the troops were to be encamped, and tents and cooking utensils were brought up. The troops had been without these from the time of crossing the Mississippi up to this time. All was now ready for the pick and spade. Prentiss and Hurlbut were ordered to send forward every man that could be spared. Cavalry especially was wanted to watch the fords along the Big Black, and to observe Johnston. I knew that Johnston was receiving reinforcements from Bragg, who was confronting Rosecrans in Tennessee. Vicksburg was so important to the enemy that I believed he would make the most strenuous efforts to raise the siege, even at the risk of losing ground elsewhere.

My line was more than fifteen miles long, extending from Haines' Bluff to Vicksburg, thence to Warrenton. The line of the enemy was about seven. In addition to this, having an enemy at Canton and Jackson, in our rear, who was being constantly reinforced, we required a second line of defence facing the other way. I had not troops enough under my command to man these. General Halleck appreciated the situation and, without being asked, forwarded reinforcements with all possible dispatch.

The ground about Vicksburg is admirable for defence. On the north it is about two hundred feet above the Mississippi River at the highest point and very much cut up by the washing rains; the ravines were grown up with cane and underbrush, while the sides and tops were covered with a dense forest. Farther south the ground flattens out somewhat, and was in cultivation. But here, too, it was cut up by ravines and small streams. The enemy's line of defence followed the crest of a ridge from the river north of the city eastward, then southerly around to the Jackson road, full three miles back of the city; thence in a southwesterly direction to the river. Deep ravines of the description given lay in front of these defences. As there is a succession of gullies, cut out by rains along the side of the ridge, the line was necessarily very irregular. To follow each of these spurs with intrenchments, so as to command the slopes on either side, would have lengthened their line very much. Generally therefore, or in many places, their line would run from near the head of one gully nearly straight to the head of another, and an outer work triangular in shape, generally open in the rear, was thrown up on the point; with a few men in this outer work they commanded the approaches to the main line completely.

Page 66

The work to be done, to make our position as strong against the enemy as his was against us, was very great. The problem was also complicated by our wanting our line as near that of the enemy as possible. We had but four engineer officers with us. Captain Prime, of the Engineer Corps, was the chief, and the work at the beginning was mainly directed by him. His health soon gave out, when he was succeeded by Captain Comstock, also of the Engineer Corps. To provide assistants on such a long line I directed that all officers who had graduated at West Point, where they had necessarily to study military engineering, should in addition to their other duties assist in the work.

The chief quartermaster and the chief commissary were graduates. The chief commissary, now the Commissary-General of the Army, begged off, however, saying that there was nothing in engineering that he was good for unless he would do for a sap-roller. As soldiers require rations while working in the ditches as well as when marching and fighting, and as we would be sure to lose him if he was used as a sap-roller, I let him off. The general is a large man; weighs two hundred and twenty pounds, and is not tall.

We had no siege guns except six thirty-two pounders, and there were none at the West to draw from. Admiral Porter, however, supplied us with a battery of navy-guns of large calibre, and with these, and the field artillery used in the campaign, the siege began. The first thing to do was to get the artillery in batteries where they would occupy commanding positions; then establish the camps, under cover from the fire of the enemy but as near up as possible; and then construct rifle-pits and covered ways, to connect the entire command by the shortest route. The enemy did not harass us much while we were constructing our batteries. Probably their artillery ammunition was short; and their infantry was kept down by our sharpshooters, who were always on the alert and ready to fire at a head whenever it showed itself above the rebel works.

In no place were our lines more than six hundred yards from the enemy. It was necessary, therefore, to cover our men by something more than the ordinary parapet. To give additional protection sand bags, bullet-proof, were placed along the tops of the parapets far enough apart to make loop-holes for musketry. On top of these, logs were put. By these means the men were enabled to walk about erect when off duty, without fear of annoyance from sharpshooters. The enemy used in their defence explosive musket-balls, no doubt thinking that, bursting over our men in the trenches, they would do some execution; but I do not remember a single case where a man was injured by a piece of one of these shells. When they were hit and the ball exploded, the wound was terrible. In these cases a solid ball would have hit as well. Their use is barbarous, because they produce increased suffering without any corresponding advantage to those using them.

Page 67

The enemy could not resort to our method to protect their men, because we had an inexhaustible supply of ammunition to draw upon and used it freely. Splinters from the timber would have made havoc among the men behind.

There were no mortars with the besiegers, except what the navy had in front of the city; but wooden ones were made by taking logs of the toughest wood that could be found, boring them out for six or twelve pound shells and binding them with strong iron bands. These answered as cochorns, and shells were successfully thrown from them into the trenches of the enemy.

The labor of building the batteries and intrenching was largely done by the pioneers, assisted by negroes who came within our lines and who were paid for their work; but details from the troops had often to be made. The work was pushed forward as rapidly as possible, and when an advanced position was secured and covered from the fire of the enemy the batteries were advanced. By the 30th of June there were two hundred and twenty guns in position, mostly light field-pieces, besides a battery of heavy guns belonging to, manned and commanded by the navy. We were now as strong for defence against the garrison of Vicksburg as they were against us; but I knew that Johnston was in our rear, and was receiving constant reinforcements from the east. He had at this time a larger force than I had had at any time prior to the battle of Champion's Hill.

As soon as the news of the arrival of the Union army behind Vicksburg reached the North, floods of visitors began to pour in. Some came to gratify curiosity; some to see sons or brothers who had passed through the terrible ordeal; members of the Christian and Sanitary Associations came to minister to the wants of the sick and the wounded. Often those coming to see a son or brother would bring a dozen or two of poultry. They did not know how little the gift would be appreciated. Many of the soldiers had lived so much on chickens, ducks and turkeys without bread during the march, that the sight of poultry, if they could get bacon, almost took away their appetite. But the intention was good.

Among the earliest arrivals was the Governor of Illinois, with most of the State officers. I naturally wanted to show them what there was of most interest. In Sherman's front the ground was the most broken and most wooded, and more was to be seen without exposure. I therefore took them to Sherman's headquarters and presented them. Before starting out to look at the lines—possibly while Sherman's horse was being saddled—there were many questions asked about the late campaign, about which the North had been so imperfectly informed. There was a little knot around Sherman and another around me, and I heard Sherman repeating, in the most animated manner, what he had said to me when we first looked down from Walnut Hills upon the land below on the 18th of May, adding: "Grant is entitled to every bit of the credit for the campaign; I opposed it. I wrote him a letter about it." But for this speech it is not likely that Sherman's opposition would have ever been heard of. His untiring energy and great

efficiency during the campaign entitle him to a full share of all the credit due for its success. He could not have done more if the plan had been his own. (13)

Page 68

On the 26th of May I sent Blair's division up the Yazoo to drive out a force of the enemy supposed to be between the Big Black and the Yazoo. The country was rich and full of supplies of both food and forage. Blair was instructed to take all of it. The cattle were to be driven in for the use of our army, and the food and forage to be consumed by our troops or destroyed by fire; all bridges were to be destroyed, and the roads rendered as nearly impassable as possible. Blair went forty-five miles and was gone almost a week. His work was effectually done. I requested Porter at this time to send the marine brigade, a floating nondescript force which had been assigned to his command and which proved very useful, up to Haines' Bluff to hold it until reinforcements could be sent.

On the 26th I also received a letter from Banks, asking me to reinforce him with ten thousand men at Port Hudson. Of course I could not comply with his request, nor did I think he needed them. He was in no danger of an attack by the garrison in his front, and there was no army organizing in his rear to raise the siege.

On the 3d of June a brigade from Hurlbut's command arrived, General Kimball commanding. It was sent to Mechanicsburg, some miles north-east of Haines' Bluff and about midway between the Big Black and the Yazoo. A brigade of Blair's division and twelve hundred cavalry had already, on Blair's return from the Yazoo, been sent to the same place with instructions to watch the crossings of the Big Black River, to destroy the roads in his (Blair's) front, and to gather or destroy all supplies.

On the 7th of June our little force of colored and white troops across the Mississippi, at Milliken's Bend, were attacked by about 3,000 men from Richard Taylor's trans-Mississippi command. With the aid of the gunboats they were speedily repelled. I sent Mower's brigade over with instructions to drive the enemy beyond the Tensas Bayou; and we had no further trouble in that quarter during the siege. This was the first important engagement of the war in which colored troops were under fire. These men were very raw, having all been enlisted since the beginning of the siege, but they behaved well.

On the 8th of June a full division arrived from Hurlbut's command, under General Sooy Smith. It was sent immediately to Haines' Bluff, and General C. C. Washburn was assigned to the general command at that point.

On the 11th a strong division arrived from the Department of the Missouri under General Herron, which was placed on our left. This cut off the last possible chance of communication between Pemberton and Johnston, as it enabled Lauman to close up on McClernand's left while Herron intrenched from Lauman to the water's edge. At this point the water recedes a few hundred yards from the high land. Through this opening no doubt the Confederate commanders had been able to get messengers under cover of night.

Page 69

On the 14th General Parke arrived with two divisions of Burnside's corps, and was immediately dispatched to Haines' Bluff. These latter troops—Herron's and Parke's—were the reinforcements already spoken of sent by Halleck in anticipation of their being needed. They arrived none too soon.

I now had about seventy-one thousand men. More than half were disposed across the peninsula, between the Yazoo at Haines' Bluff and the Big Black, with the division of Osterhaus watching the crossings of the latter river farther south and west from the crossing of the Jackson road to Baldwin's ferry and below.

There were eight roads leading into Vicksburg, along which and their immediate sides, our work was specially pushed and batteries advanced; but no commanding point within range of the enemy was neglected.

On the 17th I received a letter from General Sherman and one on the 18th from General McPherson, saying that their respective commands had complained to them of a fulsome, congratulatory order published by General McClernand to the 13th corps, which did great injustice to the other troops engaged in the campaign. This order had been sent North and published, and now papers containing it had reached our camps. The order had not been heard of by me, and certainly not by troops outside of McClernand's command until brought in this way. I at once wrote to McClernand, directing him to send me a copy of this order. He did so, and I at once relieved him from the command of the 13th army corps and ordered him back to Springfield, Illinois. The publication of his order in the press was in violation of War Department orders and also of mine.

CHAPTER XXXVIII.

Johnston's movements—fortifications at Haines' bluff—explosion of the mine—explosion of the second mine—preparing for the assault—the flag of truce—meeting with Pemberton—negotiations for surrender—accepting the terms—surrender of Vicksburg.

On the 22d of June positive information was received that Johnston had crossed the Big Black River for the purpose of attacking our rear, to raise the siege and release Pemberton. The correspondence between Johnston and Pemberton shows that all expectation of holding Vicksburg had by this time passed from Johnston's mind. I immediately ordered Sherman to the command of all the forces from Haines' Bluff to the Big Black River. This amounted now to quite half the troops about Vicksburg. Besides these, Herron and A. J. Smith's divisions were ordered to hold themselves in readiness to reinforce Sherman. Haines' Bluff had been strongly fortified on the land side, and on all commanding points from there to the Big Black at the railroad crossing batteries had

been constructed. The work of connecting by rifle-pits where this was not already done, was an easy task for the troops that were to defend them.

Page 70

We were now looking west, besieging Pemberton, while we were also looking east to defend ourselves against an expected siege by Johnston. But as against the garrison of Vicksburg we were as substantially protected as they were against us. Where we were looking east and north we were strongly fortified, and on the defensive. Johnston evidently took in the situation and wisely, I think, abstained from making an assault on us because it would simply have inflicted loss on both sides without accomplishing any result. We were strong enough to have taken the offensive against him; but I did not feel disposed to take any risk of losing our hold upon Pemberton's army, while I would have rejoiced at the opportunity of defending ourselves against an attack by Johnston.

From the 23d of May the work of fortifying and pushing forward our position nearer to the enemy had been steadily progressing. At three points on the Jackson road, in front of Leggett's brigade, a sap was run up to the enemy's parapet, and by the 25th of June we had it undermined and the mine charged. The enemy had countermined, but did not succeed in reaching our mine. At this particular point the hill on which the rebel work stands rises abruptly. Our sap ran close up to the outside of the enemy's parapet. In fact this parapet was also our protection. The soldiers of the two sides occasionally conversed pleasantly across this barrier; sometimes they exchanged the hard bread of the Union soldiers for the tobacco of the Confederates; at other times the enemy threw over hand-grenades, and often our men, catching them in their hands, returned them.

Our mine had been started some distance back down the hill; consequently when it had extended as far as the parapet it was many feet below it. This caused the failure of the enemy in his search to find and destroy it. On the 25th of June at three o'clock, all being ready, the mine was exploded. A heavy artillery fire all along the line had been ordered to open with the explosion. The effect was to blow the top of the hill off and make a crater where it stood. The breach was not sufficient to enable us to pass a column of attack through. In fact, the enemy having failed to reach our mine had thrown up a line farther back, where most of the men guarding that point were placed. There were a few men, however, left at the advance line, and others working in the countermine, which was still being pushed to find ours. All that were there were thrown into the air, some of them coming down on our side, still alive. I remember one colored man, who had been under ground at work when the explosion took place, who was thrown to our side. He was not much hurt, but terribly frightened. Some one asked him how high he had gone up. "Dun no, massa, but t'ink 'bout t'ree mile," was his reply. General Logan commanded at this point and took this colored man to his quarters, where he did service to the end of the siege.

Page 71

As soon as the explosion took place the crater was seized by two regiments of our troops who were near by, under cover, where they had been placed for the express purpose. The enemy made a desperate effort to expel them, but failed, and soon retired behind the new line. From here, however, they threw hand-grenades, which did some execution. The compliment was returned by our men, but not with so much effect. The enemy could lay their grenades on the parapet, which alone divided the contestants, and roll them down upon us; while from our side they had to be thrown over the parapet, which was at considerable elevation. During the night we made efforts to secure our position in the crater against the missiles of the enemy, so as to run trenches along the outer base of their parapet, right and left; but the enemy continued throwing their grenades, and brought boxes of field ammunition (shells), the fuses of which they would light with portfires, and throw them by hand into our ranks. We found it impossible to continue this work. Another mine was consequently started which was exploded on the 1st of July, destroying an entire rebel redan, killing and wounding a considerable number of its occupants and leaving an immense chasm where it stood. No attempt to charge was made this time, the experience of the 25th admonishing us. Our loss in the first affair was about thirty killed and wounded. The enemy must have lost more in the two explosions than we did in the first. We lost none in the second.

From this time forward the work of mining and pushing our position nearer to the enemy was prosecuted with vigor, and I determined to explode no more mines until we were ready to explode a number at different points and assault immediately after. We were up now at three different points, one in front of each corps, to where only the parapet of the enemy divided us.

At this time an intercepted dispatch from Johnston to Pemberton informed me that Johnston intended to make a determined attack upon us in order to relieve the garrison at Vicksburg. I knew the garrison would make no formidable effort to relieve itself. The picket lines were so close to each other—where there was space enough between the lines to post pickets—that the men could converse. On the 21st of June I was informed, through this means, that Pemberton was preparing to escape, by crossing to the Louisiana side under cover of night; that he had employed workmen in making boats for that purpose; that the men had been canvassed to ascertain if they would make an assault on the “Yankees” to cut their way out; that they had refused, and almost mutinied, because their commander would not surrender and relieve their sufferings, and had only been pacified by the assurance that boats enough would be finished in a week to carry them all over. The rebel pickets also said that houses in the city had been pulled down to get material to build these boats with. Afterwards this story was verified: on entering the city we found a large number of very rudely constructed boats.

Page 72

All necessary steps were at once taken to render such an attempt abortive. Our pickets were doubled; Admiral Porter was notified, so that the river might be more closely watched; material was collected on the west bank of the river to be set on fire and light up the river if the attempt was made; and batteries were established along the levee crossing the peninsula on the Louisiana side. Had the attempt been made the garrison of Vicksburg would have been drowned, or made prisoners on the Louisiana side. General Richard Taylor was expected on the west bank to co-operate in this movement, I believe, but he did not come, nor could he have done so with a force sufficient to be of service. The Mississippi was now in our possession from its source to its mouth, except in the immediate front of Vicksburg and of Port Hudson. We had nearly exhausted the country, along a line drawn from Lake Providence to opposite Bruinsburg. The roads west were not of a character to draw supplies over for any considerable force.

By the 1st of July our approaches had reached the enemy's ditch at a number of places. At ten points we could move under cover to within from five to one hundred yards of the enemy. Orders were given to make all preparations for assault on the 6th of July. The debouches were ordered widened to afford easy egress, while the approaches were also to be widened to admit the troops to pass through four abreast. Plank, and bags filled with cotton packed in tightly, were ordered prepared, to enable the troops to cross the ditches.

On the night of the 1st of July Johnston was between Brownsville and the Big Black, and wrote Pemberton from there that about the 7th of the month an attempt would be made to create a diversion to enable him to cut his way out. Pemberton was a prisoner before this message reached him.

On July 1st Pemberton, seeing no hope of outside relief, addressed the following letter to each of his four division commanders:

"Unless the siege of Vicksburg is raised, or supplies are thrown in, it will become necessary very shortly to evacuate the place. I see no prospect of the former, and there are many great, if not insuperable obstacles in the way of the latter. You are, therefore, requested to inform me with as little delay as possible, as to the condition of your troops and their ability to make the marches and undergo the fatigues necessary to accomplish a successful evacuation."

Two of his generals suggested surrender, and the other two practically did the same. They expressed the opinion that an attempt to evacuate would fail. Pemberton had previously got a message to Johnston suggesting that he should try to negotiate with me for a release of the garrison with their arms. Johnston replied that it would be a confession of weakness for him to do so; but he authorized Pemberton to use his name in making such an arrangement.

On the 3d about ten o'clock A.M. white flags appeared on a portion of the rebel works. Hostilities along that part of the line ceased at once. Soon two persons were seen coming towards our lines bearing a white flag. They proved to be General Bowen, a division commander, and Colonel Montgomery, aide-de-camp to Pemberton, bearing the following letter to me:

Page 73

"I have the honor to propose an armistice for—hours, with the view to arranging terms for the capitulation of Vicksburg. To this end, if agreeable to you, I will appoint three commissioners, to meet a like number to be named by yourself at such place and hour to-day as you may find convenient. I make this proposition to save the further effusion of blood, which must otherwise be shed to a frightful extent, feeling myself fully able to maintain my position for a yet indefinite period. This communication will be handed you under a flag of truce, by Major-General John S. Bowen."

It was a glorious sight to officers and soldiers on the line where these white flags were visible, and the news soon spread to all parts of the command. The troops felt that their long and weary marches, hard fighting, ceaseless watching by night and day, in a hot climate, exposure to all sorts of weather, to diseases and, worst of all, to the gibes of many Northern papers that came to them saying all their suffering was in vain, that Vicksburg would never be taken, were at last at an end and the Union sure to be saved.

Bowen was received by General A. J. Smith, and asked to see me. I had been a neighbor of Bowen's in Missouri, and knew him well and favorably before the war; but his request was refused. He then suggested that I should meet Pemberton. To this I sent a verbal message saying that, if Pemberton desired it, I would meet him in front of McPherson's corps at three o'clock that afternoon. I also sent the following written reply to Pemberton's letter:

"Your note of this date is just received, proposing an armistice for several hours, for the purpose of arranging terms of capitulation through commissioners, to be appointed, *etc.* The useless effusion of blood you propose stopping by this course can be ended at any time you may choose, by the unconditional surrender of the city and garrison. Men who have shown so much endurance and courage as those now in Vicksburg, will always challenge the respect of an adversary, and I can assure you will be treated with all the respect due to prisoners of war. I do not favor the proposition of appointing commissioners to arrange the terms of capitulation, because I have no terms other than those indicated above."

At three o'clock Pemberton appeared at the point suggested in my verbal message, accompanied by the same officers who had borne his letter of the morning. Generals Ord, McPherson, Logan and A. J. Smith, and several officers of my staff, accompanied me. Our place of meeting was on a hillside within a few hundred feet of the rebel lines. Near by stood a stunted oak-tree, which was made historical by the event. It was but a short time before the last vestige of its body, root and limb had disappeared, the fragments taken as trophies. Since then the same tree has furnished as many cords of wood, in the shape of trophies, as "The True Cross."

Page 74

Pemberton and I had served in the same division during part of the Mexican War. I knew him very well therefore, and greeted him as an old acquaintance. He soon asked what terms I proposed to give his army if it surrendered. My answer was the same as proposed in my reply to his letter. Pemberton then said, rather snappishly, "The conference might as well end," and turned abruptly as if to leave. I said, "Very well." General Bowen, I saw, was very anxious that the surrender should be consummated. His manner and remarks while Pemberton and I were talking, showed this. He now proposed that he and one of our generals should have a conference. I had no objection to this, as nothing could be made binding upon me that they might propose. Smith and Bowen accordingly had a conference, during which Pemberton and I, moving a short distance away towards the enemy's lines were in conversation. After a while Bowen suggested that the Confederate army should be allowed to march out with the honors of war, carrying their small arms and field artillery. This was promptly and unceremoniously rejected. The interview here ended, I agreeing, however, to send a letter giving final terms by ten o'clock that night.

Word was sent to Admiral Porter soon after the correspondence with Pemberton commenced, so that hostilities might be stopped on the part of both army and navy. It was agreed on my paging with Pemberton that they should not be renewed until our correspondence ceased.

When I returned to my headquarters I sent for all the corps and division commanders with the army immediately confronting Vicksburg. Half the army was from eight to twelve miles off, waiting for Johnston. I informed them of the contents of Pemberton's letters, of my reply and the substance of the interview, and that I was ready to hear any suggestion; but would hold the power of deciding entirely in my own hands. This was the nearest approach to a "council of war" I ever held. Against the general, and almost unanimous judgment of the council I sent the following letter:

"In conformity with agreement of this afternoon, I will submit the following proposition for the surrender of the City of Vicksburg, public stores, etc. On your accepting the terms proposed, I will march in one division as a guard, and take possession at eight A.M. tomorrow. As soon as rolls can be made out, and paroles be signed by officers and men, you will be allowed to march out of our lines, the officers taking with them their side-arms and clothing, and the field, staff and cavalry officers one horse each. The rank and file will be allowed all their clothing, but no other property. If these conditions are accepted, any amount of rations you may deem necessary can be taken from the stores you now have, and also the necessary cooking utensils for preparing them. Thirty wagons also, counting two two-horse or mule teams as one, will be allowed to transport such articles as cannot be carried along. The same conditions will be allowed to all sick and wounded officers and soldiers as fast as they become able to travel. The paroles for these latter must be signed, however, whilst officers present are authorized to sign the roll of prisoners."

Page 75

By the terms of the cartel then in force, prisoners captured by either army were required to be forwarded as soon as possible to either Aiken's landing below Dutch Gap on the James River, or to Vicksburg, there to be exchanged, or paroled until they could be exchanged. There was a Confederate commissioner at Vicksburg, authorized to make the exchange. I did not propose to take him a prisoner, but to leave him free to perform the functions of his office. Had I insisted upon an unconditional surrender there would have been over thirty thousand men to transport to Cairo, very much to the inconvenience of the army on the Mississippi. Thence the prisoners would have had to be transported by rail to Washington or Baltimore; thence again by steamer to Aiken's—all at very great expense. At Aiken's they would have had to be paroled, because the Confederates did not have Union prisoners to give in exchange. Then again Pemberton's army was largely composed of men whose homes were in the South-west; I knew many of them were tired of the war and would get home just as soon as they could. A large number of them had voluntarily come into our lines during the siege, and requested to be sent north where they could get employment until the war was over and they could go to their homes.

Late at night I received the following reply to my last letter:

"I have the honor to acknowledge the receipt of your communication of this date, proposing terms of capitulation for this garrison and post. In the main your terms are accepted; but, in justice both to the honor and spirit of my troops manifested in the defence of Vicksburg, I have to submit the following amendments, which, if acceded to by you, will perfect the agreement between us. At ten o'clock A.M. to-morrow, I propose to evacuate the works in and around Vicksburg, and to surrender the city and garrison under my command, by marching out with my colors and arms, stacking them in front of my present lines. After which you will take possession. Officers to retain their side-arms and personal property, and the rights and property of citizens to be respected."

This was received after midnight. My reply was as follows:

"I have the honor to acknowledge the receipt of your communication of 3d July. The amendment proposed by you cannot be acceded to in full. It will be necessary to furnish every officer and man with a parole signed by himself, which, with the completion of the roll of prisoners, will necessarily take some time. Again, I can make no stipulations with regard to the treatment of citizens and their private property. While I do not propose to cause them any undue annoyance or loss, I cannot consent to leave myself under any restraint by stipulations. The property which officers will be allowed to take with them will be as stated in my proposition of last evening; that is, officers will be allowed their private baggage and side-arms, and mounted officers one horse

Page 76

each. If you mean by your proposition for each brigade to march to the front of the lines now occupied by it, and stack arms at ten o'clock A.M., and then return to the inside and there remain as prisoners until properly paroled, I will make no objection to it. Should no notification be received of your acceptance of my terms by nine o'clock A.M. I shall regard them as having been rejected, and shall act accordingly. Should these terms be accepted, white flags should be displayed along your lines to prevent such of my troops as may not have been notified, from firing upon your men."

Pemberton promptly accepted these terms.

During the siege there had been a good deal of friendly sparring between the soldiers of the two armies, on picket and where the lines were close together. All rebels were known as "Johnnies," all Union troops as "Yanks." Often "Johnny" would call: "Well, Yank, when are you coming into town?" The reply was sometimes: "We propose to celebrate the 4th of July there." Sometimes it would be: "We always treat our prisoners with kindness and do not want to hurt them;" or, "We are holding you as prisoners of war while you are feeding yourselves." The garrison, from the commanding general down, undoubtedly expected an assault on the fourth. They knew from the temper of their men it would be successful when made; and that would be a greater humiliation than to surrender. Besides it would be attended with severe loss to them.

The Vicksburg paper, which we received regularly through the courtesy of the rebel pickets, said prior to the fourth, in speaking of the "Yankee" boast that they would take dinner in Vicksburg that day, that the best receipt for cooking a rabbit was "First ketch your rabbit." The paper at this time and for some time previous was printed on the plain side of wall paper. The last number was issued on the fourth and announced that we had "caught our rabbit."

I have no doubt that Pemberton commenced his correspondence on the third with a two-fold purpose: first, to avoid an assault, which he knew would be successful, and second, to prevent the capture taking place on the great national holiday, the anniversary of the Declaration of American Independence. Holding out for better terms as he did he defeated his aim in the latter particular.

At the appointed hour the garrison of Vicksburg marched out of their works and formed line in front, stacked arms and marched back in good order. Our whole army present witnessed this scene without cheering. Logan's division, which had approached nearest the rebel works, was the first to march in; and the flag of one of the regiments of his division was soon floating over the court-house. Our soldiers were no sooner inside the lines than the two armies began to fraternize. Our men had had full rations from the time the siege commenced, to the close. The enemy had been suffering, particularly towards the last. I myself saw our men taking bread from their haversacks and giving it

to the enemy they had so recently been engaged in starving out. It was accepted with avidity and with thanks.

Page 77

Pemberton says in his report:

"If it should be asked why the 4th of July was selected as the day for surrender, the answer is obvious. I believed that upon that day I should obtain better terms. Well aware of the vanity of our foe, I knew they would attach vast importance to the entrance on the 4th of July into the stronghold of the great river, and that, to gratify their national vanity, they would yield then what could not be extorted from them at any other time."

This does not support my view of his reasons for selecting the day he did for surrendering. But it must be recollected that his first letter asking terms was received about 10 o'clock A.M., July 3d. It then could hardly be expected that it would take twenty-four hours to effect a surrender. He knew that Johnston was in our rear for the purpose of raising the siege, and he naturally would want to hold out as long as he could. He knew his men would not resist an assault, and one was expected on the fourth. In our interview he told me he had rations enough to hold out for some time—my recollection is two weeks. It was this statement that induced me to insert in the terms that he was to draw rations for his men from his own supplies.

On the 4th of July General Holmes, with an army of eight or nine thousand men belonging to the trans-Mississippi department, made an attack upon Helena, Arkansas. He was totally defeated by General Prentiss, who was holding Helena with less than forty-two hundred soldiers. Holmes reported his loss at 1,636, of which 173 were killed; but as Prentiss buried 400, Holmes evidently understated his losses. The Union loss was 57 killed, 127 wounded, and between 30 and 40 missing. This was the last effort on the part of the Confederacy to raise the siege of Vicksburg.

On the third, as soon as negotiations were commenced, I notified Sherman and directed him to be ready to take the offensive against Johnston, drive him out of the State and destroy his army if he could. Steele and Ord were directed at the same time to be in readiness to join Sherman as soon as the surrender took place. Of this Sherman was notified.

I rode into Vicksburg with the troops, and went to the river to exchange congratulations with the navy upon our joint victory. At that time I found that many of the citizens had been living under ground. The ridges upon which Vicksburg is built, and those back to the Big Black, are composed of a deep yellow clay of great tenacity. Where roads and streets are cut through, perpendicular banks are left and stand as well as if composed of stone. The magazines of the enemy were made by running passage-ways into this clay at places where there were deep cuts. Many citizens secured places of safety for their families by carving out rooms in these embankments. A door-way in these cases would be cut in a high bank, starting from the level of the road or street, and after running in a few feet a room of the size required was carved out of the clay, the dirt being removed by the door-way. In some instances I saw where two rooms were cut out, for a single family, with a door-way in the clay wall separating them. Some of these

were carpeted and furnished with considerable elaboration. In these the occupants were fully secure from the shells of the navy, which were dropped into the city night and day without intermission.

Page 78

I returned to my old headquarters outside in the afternoon, and did not move into the town until the sixth. On the afternoon of the fourth I sent Captain Wm. M. Dunn of my staff to Cairo, the nearest point where the telegraph could be reached, with a dispatch to the general-in-chief. It was as follows:

“The enemy surrendered this morning. The only terms allowed is their parole as prisoners of war. This I regard as a great advantage to us at this moment. It saves, probably, several days in the capture, and leaves troops and transports ready for immediate service. Sherman, with a large force, moves immediately on Johnston, to drive him from the State. I will send troops to the relief of Banks, and return the 9th army corps to Burnside.”

This news, with the victory at Gettysburg won the same day, lifted a great load of anxiety from the minds of the President, his Cabinet and the loyal people all over the North. The fate of the Confederacy was sealed when Vicksburg fell. Much hard fighting was to be done afterwards and many precious lives were to be sacrificed; but the *Morale* was with the supporters of the Union ever after.

I at the same time wrote to General Banks informing him of the fall and sending him a copy of the terms; also saying I would send him all the troops he wanted to insure the capture of the only foothold the enemy now had on the Mississippi River. General Banks had a number of copies of this letter printed, or at least a synopsis of it, and very soon a copy fell into the hands of General Gardner, who was then in command of Port Hudson. Gardner at once sent a letter to the commander of the National forces saying that he had been informed of the surrender of Vicksburg and telling how the information reached him. He added that if this was true, it was useless for him to hold out longer. General Banks gave him assurances that Vicksburg had been surrendered, and General Gardner surrendered unconditionally on the 9th of July. Port Hudson with nearly 6,000 prisoners, 51 guns, 5,000 small-arms and other stores fell into the hands of the Union forces: from that day to the close of the rebellion the Mississippi River, from its source to its mouth, remained in the control of the National troops.

Pemberton and his army were kept in Vicksburg until the whole could be paroled. The paroles were in duplicate, by organization (one copy for each, Federals and Confederates), and signed by the commanding officers of the companies or regiments. Duplicates were also made for each soldier and signed by each individually, one to be retained by the soldier signing and one to be retained by us. Several hundred refused to sign their paroles, preferring to be sent to the North as prisoners to being sent back to fight again. Others again kept out of the way, hoping to escape either alternative.

Page 79

Pemberton appealed to me in person to compel these men to sign their paroles, but I declined. It also leaked out that many of the men who had signed their paroles, intended to desert and go to their homes as soon as they got out of our lines.

Pemberton hearing this, again appealed to me to assist him. He wanted arms for a battalion, to act as guards in keeping his men together while being marched to a camp of instruction, where he expected to keep them until exchanged. This request was also declined. It was precisely what I expected and hoped that they would do. I told him, however, that I would see that they marched beyond our lines in good order. By the eleventh, just one week after the surrender, the paroles were completed and the Confederate garrison marched out. Many deserted, and fewer of them were ever returned to the ranks to fight again than would have been the case had the surrender been unconditional and the prisoners sent to the James River to be paroled.

As soon as our troops took possession of the city guards were established along the whole line of parapet, from the river above to the river below. The prisoners were allowed to occupy their old camps behind the intrenchments. No restraint was put upon them, except by their own commanders. They were rationed about as our own men, and from our supplies. The men of the two armies fraternized as if they had been fighting for the same cause. When they passed out of the works they had so long and so gallantly defended, between lines of their late antagonists, not a cheer went up, not a remark was made that would give pain. Really, I believe there was a feeling of sadness just then in the breasts of most of the Union soldiers at seeing the dejection of their late antagonists.

The day before the departure the following order was issued:

"Paroled prisoners will be sent out of here to-morrow. They will be authorized to cross at the railroad bridge, and move from there to Edward's Ferry, (14) and on by way of Raymond. Instruct the commands to be orderly and quiet as these prisoners pass, to make no offensive remarks, and not to harbor any who fall out of ranks after they have passed."

CHAPTER XXXIX.

Retrospect of the campaign—Sherman's movements—proposed movement upon Mobile—A painful accident—ordered to report at Cairo.

The capture of Vicksburg, with its garrison, ordnance and ordnance stores, and the successful battles fought in reaching them, gave new spirit to the loyal people of the North. New hopes for the final success of the cause of the Union were inspired. The victory gained at Gettysburg, upon the same day, added to their hopes. Now the Mississippi River was entirely in the possession of the National troops; for the fall of Vicksburg gave us Port Hudson at once. The army of northern Virginia was driven out

of Pennsylvania and forced back to about the same ground it occupied in 1861. The Army of the Tennessee united with the Army of the Gulf, dividing the Confederate States completely.

Page 80

The first dispatch I received from the government after the fall of Vicksburg was in these words:

"I fear your paroling the prisoners at Vicksburg, without actual delivery to a proper agent as required by the seventh article of the cartel, may be construed into an absolute release, and that the men will immediately be placed in the ranks of the enemy. Such has been the case elsewhere. If these prisoners have not been allowed to depart, you will detain them until further orders."

Halleck did not know that they had already been delivered into the hands of Major Watts, Confederate commissioner for the exchange of prisoners.

At Vicksburg 31,600 prisoners were surrendered, together with 172 cannon about 60,000 muskets and a large amount of ammunition. The small-arms of the enemy were far superior to the bulk of ours. Up to this time our troops at the West had been limited to the old United States flint-lock muskets changed into percussion, or the Belgian musket imported early in the war—almost as dangerous to the person firing it as to the one aimed at—and a few new and improved arms. These were of many different calibers, a fact that caused much trouble in distributing ammunition during an engagement. The enemy had generally new arms which had run the blockade and were of uniform caliber. After the surrender I authorized all colonels whose regiments were armed with inferior muskets, to place them in the stack of captured arms and replace them with the latter. A large number of arms turned in to the Ordnance Department as captured, were thus arms that had really been used by the Union army in the capture of Vicksburg.

In this narrative I have not made the mention I should like of officers, dead and alive, whose services entitle them to special mention. Neither have I made that mention of the navy which its services deserve. Suffice it to say, the close of the siege of Vicksburg found us with an army unsurpassed, in proportion to its numbers, taken as a whole of officers and men. A military education was acquired which no other school could have given. Men who thought a company was quite enough for them to command properly at the beginning, would have made good regimental or brigade commanders; most of the brigade commanders were equal to the command of a division, and one, Ransom, would have been equal to the command of a corps at least. Logan and Crocker ended the campaign fitted to command independent armies.

General F. P. Blair joined me at Milliken's Bend a full-fledged general, without having served in a lower grade. He commanded a division in the campaign. I had known Blair in Missouri, where I had voted against him in 1858 when he ran for Congress. I knew him as a frank, positive and generous man, true to his friends even to a fault, but always a leader. I dreaded his coming; I knew from experience that it was more difficult to command two generals desiring to be leaders than it was to command one army officered intelligently and with subordination. It affords me the greatest pleasure to

record now my agreeable disappointment in respect to his character. There was no man braver than he, nor was there any who obeyed all orders of his superior in rank with more unquestioning alacrity. He was one man as a soldier, another as a politician.

Page 81

The navy under Porter was all it could be, during the entire campaign. Without its assistance the campaign could not have been successfully made with twice the number of men engaged. It could not have been made at all, in the way it was, with any number of men without such assistance. The most perfect harmony reigned between the two arms of the service. There never was a request made, that I am aware of, either of the flag-officer or any of his subordinates, that was not promptly complied with.

The campaign of Vicksburg was suggested and developed by circumstances. The elections of 1862 had gone against the prosecution of the war. Voluntary enlistments had nearly ceased and the draft had been resorted to; this was resisted, and a defeat or backward movement would have made its execution impossible. A forward movement to a decisive victory was necessary. Accordingly I resolved to get below Vicksburg, unite with Banks against Port Hudson, make New Orleans a base and, with that base and Grand Gulf as a starting point, move our combined forces against Vicksburg. Upon reaching Grand Gulf, after running its batteries and fighting a battle, I received a letter from Banks informing me that he could not be at Port Hudson under ten days, and then with only fifteen thousand men. The time was worth more than the reinforcements; I therefore determined to push into the interior of the enemy's country.

With a large river behind us, held above and below by the enemy, rapid movements were essential to success. Jackson was captured the day after a new commander had arrived, and only a few days before large reinforcements were expected. A rapid movement west was made; the garrison of Vicksburg was met in two engagements and badly defeated, and driven back into its stronghold and there successfully besieged. It looks now as though Providence had directed the course of the campaign while the Army of the Tennessee executed the decree.

Upon the surrender of the garrison of Vicksburg there were three things that required immediate attention. The first was to send a force to drive the enemy from our rear, and out of the State. The second was to send reinforcements to Banks near Port Hudson, if necessary, to complete the triumph of opening the Mississippi from its source to its mouth to the free navigation of vessels bearing the Stars and Stripes. The third was to inform the authorities at Washington and the North of the good news, to relieve their long suspense and strengthen their confidence in the ultimate success of the cause they had so much at heart.

Soon after negotiations were opened with General Pemberton for the surrender of the city, I notified Sherman, whose troops extended from Haines' Bluff on the left to the crossing of the Vicksburg and Jackson road over the Big Black on the right, and directed him to hold his command in readiness to advance and drive the enemy from the State as soon as Vicksburg surrendered. Steele and Ord were directed to be in readiness to join Sherman in his move against General Johnston, and Sherman was advised of this also. Sherman moved promptly, crossing the Big Black at three different points with as many columns, all concentrating at Bolton, twenty miles west of Jackson.

Page 82

Johnston heard of the surrender of Vicksburg almost as soon as it occurred, and immediately fell back on Jackson. On the 8th of July Sherman was within ten miles of Jackson and on the 11th was close up to the defences of the city and shelling the town. The siege was kept up until the morning of the 17th, when it was found that the enemy had evacuated during the night. The weather was very hot, the roads dusty and the water bad. Johnston destroyed the roads as he passed and had so much the start that pursuit was useless; but Sherman sent one division, Steele's, to Brandon, fourteen miles east of Jackson.

The National loss in the second capture of Jackson was less than one thousand men, killed, wounded and missing. The Confederate loss was probably less, except in captured. More than this number fell into our hands as prisoners.

Medicines and food were left for the Confederate wounded and sick who had to be left behind. A large amount of rations was issued to the families that remained in Jackson. Medicine and food were also sent to Raymond for the destitute families as well as the sick and wounded, as I thought it only fair that we should return to these people some of the articles we had taken while marching through the country. I wrote to Sherman: "Impress upon the men the importance of going through the State in an orderly manner, abstaining from taking anything not absolutely necessary for their subsistence while travelling. They should try to create as favorable an impression as possible upon the people." Provisions and forage, when called for by them, were issued to all the people, from Bruinsburg to Jackson and back to Vicksburg, whose resources had been taken for the supply of our army. Very large quantities of groceries and provisions were so issued.

Sherman was ordered back to Vicksburg, and his troops took much the same position they had occupied before—from the Big Black to Haines' Bluff. Having cleaned up about Vicksburg and captured or routed all regular Confederate forces for more than a hundred miles in all directions, I felt that the troops that had done so much should be allowed to do more before the enemy could recover from the blow he had received, and while important points might be captured without bloodshed. I suggested to the General-in-chief the idea of a campaign against Mobile, starting from Lake Pontchartrain. Halleck preferred another course. The possession of the trans-Mississippi by the Union forces seemed to possess more importance in his mind than almost any campaign east of the Mississippi. I am well aware that the President was very anxious to have a foothold in Texas, to stop the clamor of some of the foreign governments which seemed to be seeking a pretext to interfere in the war, at least so far as to recognize belligerent rights to the Confederate States. This, however, could have been easily done without wasting troops in western Louisiana and eastern Texas, by sending a garrison at once to Brownsville on the Rio Grande.

Page 83

Halleck disapproved of my proposition to go against Mobile, so that I was obliged to settle down and see myself put again on the defensive as I had been a year before in west Tennessee. It would have been an easy thing to capture Mobile at the time I proposed to go there. Having that as a base of operations, troops could have been thrown into the interior to operate against General Bragg's army. This would necessarily have compelled Bragg to detach in order to meet this fire in his rear. If he had not done this the troops from Mobile could have inflicted inestimable damage upon much of the country from which his army and Lee's were yet receiving their supplies. I was so much impressed with this idea that I renewed my request later in July and again about the 1st of August, and proposed sending all the troops necessary, asking only the assistance of the navy to protect the debarkation of troops at or near Mobile. I also asked for a leave of absence to visit New Orleans, particularly if my suggestion to move against Mobile should be approved. Both requests were refused. So far as my experience with General Halleck went it was very much easier for him to refuse a favor than to grant one. But I did not regard this as a favor. It was simply in line of duty, though out of my department.

The General-in-chief having decided against me, the depletion of an army, which had won a succession of great victories, commenced, as had been the case the year before after the fall of Corinth when the army was sent where it would do the least good. By orders, I sent to Banks a force of 4,000 men; returned the 9th corps to Kentucky and, when transportation had been collected, started a division of 5,000 men to Schofield in Missouri where Price was raiding the State. I also detached a brigade under Ransom to Natchez, to garrison that place permanently. This latter move was quite fortunate as to the time when Ransom arrived there. The enemy happened to have a large number, about 5,000 head, of beef cattle there on the way from Texas to feed the Eastern armies, and also a large amount of munitions of war which had probably come through Texas from the Rio Grande and which were on the way to Lee's and other armies in the East.

The troops that were left with me around Vicksburg were very busily and unpleasantly employed in making expeditions against guerilla bands and small detachments of cavalry which infested the interior, and in destroying mills, bridges and rolling stock on the railroads. The guerillas and cavalry were not there to fight but to annoy, and therefore disappeared on the first approach of our troops.

The country back of Vicksburg was filled with deserters from Pemberton's army and, it was reported, many from Johnston's also. The men determined not to fight again while the war lasted. Those who lived beyond the reach of the Confederate army wanted to get to their homes. Those who did not, wanted to get North where they could work for their support till the war was over. Besides all this there was quite a peace feeling, for the time being, among the citizens of that part of Mississippi, but this feeling soon subsided. It is not probable that Pemberton got off with over 4,000 of his army to the camp where he proposed taking them, and these were in a demoralized condition.

Page 84

On the 7th of August I further depleted my army by sending the 13th corps, General Ord commanding, to Banks. Besides this I received orders to co-operate with the latter general in movements west of the Mississippi. Having received this order I went to New Orleans to confer with Banks about the proposed movement. All these movements came to naught.

During this visit I reviewed Banks' army a short distance above Carrollton. The horse I rode was vicious and but little used, and on my return to New Orleans ran away and, shying at a locomotive in the street, fell, probably on me. I was rendered insensible, and when I regained consciousness I found myself in a hotel near by with several doctors attending me. My leg was swollen from the knee to the thigh, and the swelling, almost to the point of bursting, extended along the body up to the arm-pit. The pain was almost beyond endurance. I lay at the hotel something over a week without being able to turn myself in bed. I had a steamer stop at the nearest point possible, and was carried to it on a litter. I was then taken to Vicksburg, where I remained unable to move for some time afterwards.

While I was absent General Sherman declined to assume command because, he said, it would confuse the records; but he let all the orders be made in my name, and was glad to render any assistance he could. No orders were issued by my staff, certainly no important orders, except upon consultation with and approval of Sherman.

On the 13th of September, while I was still in New Orleans, Halleck telegraphed to me to send all available forces to Memphis and thence to Tuscumbia, to co-operate with Rosecrans for the relief of Chattanooga. On the 15th he telegraphed again for all available forces to go to Rosecrans. This was received on the 27th. I was still confined to my bed, unable to rise from it without assistance; but I at once ordered Sherman to send one division to Memphis as fast as transports could be provided. The division of McPherson's corps, which had got off and was on the way to join Steele in Arkansas, was recalled and sent, likewise, to report to Hurlbut at Memphis. Hurlbut was directed to forward these two divisions with two others from his own corps at once, and also to send any other troops that might be returning there. Halleck suggested that some good man, like Sherman or McPherson, should be sent to Memphis to take charge of the troops going east. On this I sent Sherman, as being, I thought, the most suitable person for an independent command, and besides he was entitled to it if it had to be given to any one. He was directed to take with him another division of his corps. This left one back, but having one of McPherson's divisions he had still the equivalent.

Before the receipt by me of these orders the battle of Chickamauga had been fought and Rosecrans forced back into Chattanooga. The administration as well as the General-in-chief was nearly frantic at the situation of affairs there. Mr. Charles A. Dana, an officer of the War Department, was sent to Rosecrans' headquarters. I do not know what his instructions were, but he was still in Chattanooga when I arrived there at a later period.

Page 85

It seems that Halleck suggested that I should go to Nashville as soon as able to move and take general direction of the troops moving from the west. I received the following dispatch dated October 3d: "It is the wish of the Secretary of War that as soon as General Grant is able he will come to Cairo and report by telegraph." I was still very lame, but started without delay. Arriving at Columbus on the 16th I reported by telegraph: "Your dispatch from Cairo of the 3d directing me to report from Cairo was received at 11.30 on the 10th. Left the same day with staff and headquarters and am here en route for Cairo."

End of volume I.
