Essay

Being an intern at WaMu would be a great opportunity. Although I am a sophomore in high school, I feel that I am the best candidate for the job. By earning respectable grades in honors classes, and having the willingness to take them, I believe I prove that I am hard working and eager to learn new things. Working at WaMu would do many things for me. Along with gaining job experience and being able to work with people, it would allow me to improve my technological skills and my knowledge of the inner workings of a bank; both of which I am interested in. To know how banks work, how to handle money, and to learn new investment opportunities will be very important in my future. I am looking forward to meeting and working with you.
