- They are not given any notice of something they should have the right to know
- They do not get a profit in the procedure
- They are
- It cost too much and is too expensive
- It takes 8 weeks for the results to be presented
- There is a 0.05 % of the result to be fall

-

DNA is genetic "blueprint" which contains all the information necessary for a living being. DNA is wound into tight thread-like structures called chromosomes which are found in every human body. Humans have 46 chromosomes in total are inherited from the mother (in the egg) and half from the father (sperm).
