Essay

Leadership means so much to me. Some people might not know it, but without all the leadership what would this world be like now. I have seen so many great things go on in this world because of the great leaders we have today. Without these leaders we would be lost.

We wouldn't be able to have the freedom that we have. I have been a leader before, and I have taken great pride in being able to be a leader. A leader is someone who is willing to listen to what has to be said, and that will take your advice when you have something to be said. I have been a leader in O.M. which is Odyssey of the Mind! That was a great experience. We were able to put together a skit and perform in Florida.

I also was able to meet great people while I was there. I know how to work hard and I am willing to go and do the things that need to be done. I am very friendly I'm not scared to go and meet new people. I work hard. And I am willing to work hard to go to H.O.B.Y. I also know many people who are great leaders and who work hard to make things perfect for everybody.

You need leadership for most things, or you would be lost without it. You need it in school, and in sports, and many other activities. I know that I could be that person to be a leader and, represent the Sophomore Class for Wendell High School.
