# Jacobus Bontius

**1598?-1631**

Physician and naturalist, perhaps of Danish origin, who is known for supplying the first scientific documentation of the disease beriberi, is a disease known to Asia and the South Pacific and is caused by a nutritional deficiency of vitamin B<sub>1</sub>; this disease is known in groups where there is a high intake of rice. He observed the disease firsthand in the South Pacific and published his findings in 1642.
